Director IDWR,

As a well water holder in District 130, who is not a member of a water district. I'm petitioning you to allow me to continue to pump from my well for the following reason's.

1) My well falls within 25 yards of the District 130 boundary edge on the north west end.

2) The boundary for District 130 used Clover Creek for it"s north limits only because it made a easy natural border. This well sits not only so close to that border, it also is west or down stream from Hagerman spring area.

3)Most important though is that due to farming practice's because of drought years, the well has not been pumped to it's full water right. I do not see this changing this year. This should help supplement ground water from my area.

I would hope the Director will take this into account before shutting down pumping on this well.

Scott Huxhold, manager
