To IDWR 3/11/04

My name is Delbert Kohtz. I am protesti the IDWR order requiring the ground water Districts to furnish mitigation water to the spring users, on the basis the rights given to the spring users should never have been issu ~~[illegible]~~ 20 to 50% of the water they have bee getting at the time they filed for their rights was water that has been recharging the aquifer from canals and irrigation. The water volume coming from the springs is still 1000 cfs more the the historical flows. Now they are asking the pumpers to guarantee the higher flows.
