

Crandall Report  
on NSCC losses

4/1/1923

Please return  
to Mr. Crandall

USE OF WATER ON THE TWIN FALLS NORTH SIDE  
IRRIGATION PROJECT  
IDAHO

TABLE OF CONTENTS.

Pages 1-5. General Description of Project.

Pages 5-9. Collection of records, measuring devices used, methods of gathering and assembling data.

Page 10 . Supply in Acre-Feet for N.S. Project, 1916.

Page 11 . Use In Acre Feet for N.S. Project, 1916.

Page 12 . Use as percentage of supply ,1916.

Page 13 . Supply in Acre Feet, 1917

Page 14 . Use in Acre Feet, 1917.

Page 15 . Use as percentage of supply, 1917

Page 16 . Supply in Acre Feet, 1918.

Page 17 . Use in Acre Feet, 1918.

Page 18 . Use as percentage of supply, 1918

Page 19 . Supply in Acre Feet, 1919.

Page 20 . Use in Acre Feet, 1919

Page 21 . Use as percentage of supply, 1919

Page 22 . Supply in Acre Feet, 1920

Page 23 . ~~Supply~~ Use in Acre Feet, 1920

Page 24 . Use as percentage of supply ,1920

Pages 25-35. Losses

Pages 35-36. Over-discharge of settlers measuring devices.

Pages 36-37. Settlers waste into canal system.

Pages 38-39. Distribution of settlers deliveries during season.

Pages 39-43. Soil moisture studies.

Pages 43-46. Ground water investigations.

Pages 46-51. Net duty of water.

Pages 52-54. Meteorological Observations.

Page 55. General Conclusions on seepage losses.

## MAPS AND DIAGRAMS.

1. Map of Twin Falls North side Project showing lateral systems.
2. Characteristic curves of Bethridge type water meter.
3. Sample of lateral summary sheet.
4. Diagram showing relation between temperatures and loss.
5. Diagram showing loss in Wilson Lake, 1916.
6. Diagram showing relation between temperature and loss in Wilson Lake and Jerome Reservoir, 1916.
7. Diagram showing relation between velocity and loss for canals in deep fine sand loam soils.
8. Diagram showing relation between velocity and loss for canals in shallow sandy loam and blow sand soils.
9. Diagram showing relation between velocity and loss for canals in rock formation.
10. Diagram showing relation between size of canal and rate of loss in per cent per mile.
11. Map of Twin Falls North Side Project showing groundwater contours.
12. Diagram showing relation between settlers deliveries, mean moisture content of soil and groundwater table.
13. Sample rating curve for staff gaging station.
14. Sample rating curve for weir station with excessive velocity of approach.
15. Sample rating curve for weir station with moderate velocity of approach.
