CAREY ACT

OPERATIONS DIVISION
ADMINISTRATOR'S MEMORANDUM

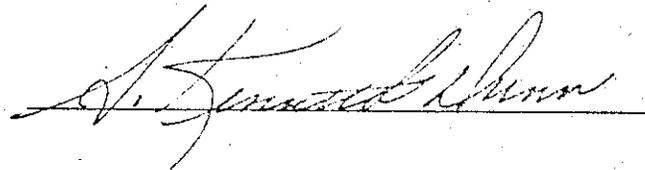

TO: District Engineers & Bureau Chiefs

FROM: A. Kenneth Dunn

The questions has come up as to what should be done with sprinkler systems which will be used on Carey Act projects or other project developments.

If is is the intent of the developer to have the system transferred to a water company to operate the system after the development costs have been re-paid, then the entire project can be covered under one application.

f is is the intent of the developer to transfer ownership of each well to the individual owner after the pay out period, then each well must be covered by a separate application.

A. Kenneth Dunn
