Subject: RE: Application for Permit No. 63-32703 (Amended) -- Orchard Ranch LLC

Norm:

I received the amended application and anticipate legal notices will be published in last half of October.

Please submit financial resources information for the proposed irrigation development required by Water Appropriation Rule 40.05.f.i-ii. The information should be submitted within sixty (60) days to maintain the application in good standing. Thank you for your attention this matter.

Steve Lester
IDWR Western Region

Subject: Application for Permit No. 63-32703 (Amended) -- Orchard Ranch LLC

Steve,

Consistent with our previous telephone conversations and email correspondence, today SPF Water Engineering is filing an amended application for permit (63-32703) on behalf of our mutual client, Orchard Ranch LLC.

Our client has opted to change the configuration of the project from municipal to agricultural use. The amendments reflect this change and our client is prepared to proceed accordingly. If and when it becomes prudent to reconsider, our client reserves the right to again amend the application or to seek changes through a transfer after licensing, as appropriate.

We believe this action renders IDWR's previous request for additional information moot in most, if not all, regards as it was geared toward municipal, not agricultural use. If additional information is required for processing of the amended application for permit to proceed, please let us know and we will be glad to respond.

Thank you for your continued attention to this matter.

Sincerely,

Norm Semanko
