Subject: Request for Extension to Respond
Application for Permit No(s) 61-12090

Dear Steve,

SPF is currently working on a response to your letter dated May 17, 2007. As you may recall, the application was submitted by Boise-Highland Development Co. in 2006. Boise Highland worked with Toothman-Orton and others to develop a conceptual plan for the property and the parcel has been platted for a residential development.

Our client, operating as Nevid LLC, recently purchased the Boise-Highland property and is in the process of integrating the conceptual plan into the existing plans for the Elk Creek Canyon LLC project just north of the subject property. (Our client, Dennis Rider, is a manager for both Nevid LLC and Elk Creek Canyon LLC.)

SPF is completing a groundwater assessment for the Elk Creek Canyon project and anticipated using the information from that report to support Elk Creek's applications for permit (61-12095 and 61-12096). Given the proximity of the Boise-Highland property, it makes sense to incorporate the new area in our assessment.

Please accept our request to delay a response for 60 days. This should provide adequate time to complete the groundwater assessment, coordinate our response with any changes to the conceptual plan by the new owner, and allow Nevid LLC to complete the registration process with the Idaho Secretary of State's office. Thank you for your consideration of this matter.

Sincerely,

Roxanne Brown
