This is the memo that will go in the packet along with the diversions data, the IESW007 memo, the Willow Creek memo and the spreadsheet mapping diversions to entities.

If Kevin Lakey is OK with the IESW007 memo, I may send the packet out without the diversions data, just so Willem can get an answer more quickly on what ditches are mapped to what entities.

David -

This is the memo I couldn't find on IDWR's website

Rick -

Apparently I never got this to you so it could be posted. It is now somewhat stale but I think it would be good to post it in ESPAM2 "superceded documentation."

The changes made since this was written are:

IESW007 and IESW054 have been combined into IESW059

IESW000, IESW031 and IESW041 have been merged into IESW000.

Thanks,

Bryce
