Bryce,

It appears that the 2002 irrigated lands database is complete. Is this something we can add to ESPAM version 2 or has it been already?

Rick

Subject: 2002 ESPA Land Use data

Genna,

I updated the metadata and put the Geodatabase with a new name at: P:\BKramber\Genna\2002_IrrigatedLands_ESPA.gdb

We are done with the 2002 land use data. We need to work on 1996 next but let me see how much I can automate the process before we proceed with that. Thanks for your work on this.

Linda,

Can you copy the Geodatabase to: X:\Spatial\LandCover_Vegetation\SnakePlain

Margie,

Please give Bryce a copy of this data when you give him the 2009 NAIP images.

Thanks,

Bill

Hi Bill -

Done! The updated geodatabase is located in the same place – same name. Please let me know if you have any questions or if I can further assist.

Thanks!

Genna

We can add it, it adds several person days of work. We have to find appropriate aerial photography for 2002 and hand draw "actual" irrigated polygons on 100 sample model cells, to calculate the RED values.

Can we get the newest and truest water budget, which is almost ready, out the door, then immediately attack this?

Bryce

That's fine.
