Allan and Mike -

Mike had told me that the NIR placeholder has some issues near Hagerman. Looking at some of our output maps, it appears there is also something odd going on near Minidoka.

Allan -

So far we haven't seen any other scary things in P100527A, but we haven't checked everything.

Bryce

Bryce

I am in the process of taking this thing out to test fly it, so your info provides me with some comfort.

Allan

Greg is making some maps of a single year, and I am planning to map (NIR/Precip). Methinks we may have trouble with the disparity between the two different interpolation methods.

We should be able to shoot you something to look at tomorrow.

B
