

Figure 6 - Water balance for the entire LPRV aquifer system, reconstructed from the 1993-94 accounting for the southern aquifer. Pumping withdrawals (in conical arrows) reflect actual municipal demand plus estimated non-municipal demand. All values are in Bgal/yr. Estimated river recharge is 0.3 Bgal/yr (contributing only in the southern valley), and total storage change over the entire aquifer is -0.46 Bgal/yr.
