

**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

IN THE MATTER OF DISTRIBUTION OF)
 WATER TO WATER RIGHTS NOS. 36-04013A,)
 36-04013B, AND 36-07148 (SNAKE RIVER)
 FARM))

IN THE MATTER OF MITIGATION PLAN)
 OF THE NORTH SNAKE AND MAGIC)
 VALLEY GROUND WATER DISTRICTS)
 IMPLEMENTED BY APPLICATIONS FOR)
 PERMIT NOS. 02-10405 AND 36-16645 AND)
 APPLICATION FOR TRANSFER NO. 74904)
 TO PROVIDE REPLACEMENT WATER FOR)
 CLEAR SPRINGS SNAKE RIVER FARM)

(Water District Nos. 130 and 140))

**FINAL ORDER ACCEPTING
 GROUND WATER DISTRICTS'
 WITHDRAWAL OF AMENDED
 MITIGATION PLAN, DENYING
 MOTION TO STRIKE, DENYING
 SECOND MITIGATION PLAN
 AND AMENDED SECOND
 MITIGATION PLAN IN PART;
 AND NOTICE OF CURTAILMENT**

FINDINGS OF FACT

1. These proceedings were commenced on May 2, 2005 when Larry Cope, President and CEO of Clear Springs Foods, Inc. ("Clear Springs"), filed a letter with the Director of the Department of Water Resources ("Director" or "Department") requesting administration of junior-priority water rights to supply Clear Springs' senior surface water rights. On July 8, 2005, the Director issued an order ("July 2005 Order") finding that senior surface water rights held by Clear Springs had been injured by diversions by junior ground water users. The July 2005 Order ordered curtailment of junior ground water users, stating as follows:

Involuntary curtailment will be phased-in over a five-year period, offset by substitute curtailment (conversions and voluntary curtailment) provided through the ground water district(s) or irrigation district through which mitigation can be provided and verified by the Department. Involuntary curtailment and substitute curtailment together must be implemented in 2005, 2006, 2007, 2008, and 2009, such that based on simulations using the Department's ground water model for the ESPA, phased curtailment will result in simulated cumulative increases to the average discharge of springs in the Buhl Gage to Thousand Springs spring reach, which includes the springs that provide the source of water for the water rights held by Clear Springs for its Snake River Farm, at steady state conditions of at least 8 cfs, 16 cfs, 23 cfs, 31 cfs, and 38 cfs, for each year respectively.

July 2005 Order at 37.¹

2. The percent of reach gain in the Buhl Gage to Thousand Springs spring reach that will directly benefit Clear Springs is 6.9%. *Final Order Regarding Blue Lakes and Clear Springs Delivery Calls* at 3, ¶ 9 (July 11, 2008) (“Final Order”). Six-point-nine percent of 38 cfs is 2.62 cfs. Junior ground water users were afforded a choice of providing replacement water to the Buhl Gage to Thousand Springs spring reach (38 cfs in the fifth year of the phased-in curtailment period), or replacement water directly to Clear Springs (2.62 cfs in the fifth year of the phased-in curtailment period).

3. In the years 2005, 2006, and 2007, the Magic Valley Ground Water District and the North Snake Ground Water District (“Ground Water Districts”), represented by the Idaho Ground Water Appropriators, Inc. (“IGWA”), provided replacement water to the Buhl Gage to Thousand Springs spring reach. Replacement water to the reach was provided mainly in the form of conversions from ground water to surface water, voluntary fallowing of acres irrigated by ground water through the federal government’s Conservation Reserve Enhancement Program (“CREP”), and conveyance of leased surface water through the North Side Canal Company’s delivery system to allow incidental recharge of the Eastern Snake Plain Aquifer (“ESPA”).

4. At the time the Final Order was issued, the Director had before him the *Mitigation Plan of North Snake Ground Water District and Magic Valley Ground Water District* (June 13, 2008) (“Mitigation Plan”). In the Final Order, the Director stated “It is anticipated that a post-audit of the replacement water activities undertaken by IGWA for the benefit of Clear Springs in the Buhl Gage to Thousand Springs reach will be performed during t[he] proceedings [involving the Mitigation Plan].” *Final Order* at 8, ¶ 27.

5. The Mitigation Plan proposed to maintain a similar level of conversion and CREP acres as in 2006 and 2007. In addition, the Mitigation Plan proposed to fulfill the remaining obligation to Clear Springs from the July 2005 Order by providing water directly to Clear Springs’ facility. The direct replacement alternative proposed by the Ground Water Districts was the delivery of all or part of water right no. 36-4076, held by the Idaho Department of Fish and Game, to the head of Clear Springs’ raceways.²

¹ In November and December of 2007, a multi-week hearing was held on Clear Springs’ delivery call before independent hearing officer Gerald F. Schroeder (“Hearing Officer”). On January 11, 2008, the Hearing Officer issued his *Opinion Constituting Findings of Fact, Conclusions of Law, and Recommendation* (“Recommended Order”). The Recommended Order approved the July 2005 Order on all major points. The recommendations of the Hearing Officer were accepted by the Director with a few minor modifications in his *Final Order* (July 11, 2008) (“Final Order”). The Final Order is currently on judicial review before the Honorable John M. Melanson of the Fifth Judicial District.

² While not proposed in a CM Rule 43 mitigation plan, the Ground Water Districts had informed the Director and parties to the proceeding, including Clear Springs, of its attempts to lease water right nos. 36-4148B and 36-16237, held by Clear Lake Country Club, as a direct replacement supply to be delivered at the head of Clear Springs’ raceways. The Ground Water Districts were apparently unsuccessful in securing the use of this water as a direct replacement supply to Clear Springs.

6. On September 5, 2008, an *Amended Mitigation Plan* was filed by the Ground Water Districts to replace the Mitigation Plan. The Amended Mitigation Plan stated that “Reach gains resulting from CREP may vary annually based upon increases or decreases in CREP acreage.” *Amended Mitigation Plan* at 7. Delivery of surface water to conversion acres “is for the 2008 irrigation season only.” *Id.* at 7-8. Any remaining obligation under the July 2005 Order was to be achieved by providing water directly to Clear Springs’ facility. The direct replacement alternatives proposed by the Ground Water Districts included the direct pump-back of effluent water to the head of Clear Springs’ raceways,³ and delivery of all or part of water right no. 36-4076 to Clear Springs’ raceways. “Any shortfalls in direct delivery . . . will be made up by a combination of conversion deliveries and late season recharge” *Id.* at 12.

7. On October 22, 2008, the Director sent a letter to the holders of junior-priority ground water rights warning of potential curtailment during the 2009 irrigation season (“Curtailment Warning Letter”). For holders of junior-priority ground water rights in the Buhl Gage to Thousand Springs spring reach, the Curtailment Warning Letter stated as follows:

The 2005 Clear Springs order provides that replacement water in the amount of 38 cubic feet per second (cfs) shall be delivered during year five, 2009, to the Buhl Gage to Thousand Springs reach. This amount has since been updated to 38.9 cfs based on the inclusion of ground water rights from the Clear Springs curtailment area in Water District No. 140. Without additional mitigation or replacement water being provided, year five of phased curtailment shall require curtailment of ground water rights having a priority date later than (junior to) January 4, 1973. This date could be adjusted based on the submittal of an acceptable mitigation plan, and it assumes continuation of existing conversion acres and Conservation Reserve Enhancement Program (CREP) acres.

The Curtailment Warning Letter is located on the Department’s website at: [http://www.idwr.idaho.gov/about/issues/Curtailment Order Information/Curtailment Information 2009/PDF files/2008 Curtailment Warning %20Letter for 2009.pdf](http://www.idwr.idaho.gov/about/issues/Curtailment%20Order%20Information/Curtailment%20Information%202009/PDF%20files/2008%20Curtailment%20Warning%20Letter%20for%202009.pdf).

8. With the inclusion of Water District No. 140, the direct replacement obligation to Clear Springs increased to 2.68 cfs (6.9% of 38.9 cfs).

9. On December 18, 2008, the Ground Water Districts filed their *Second Mitigation Plan of North Snake Ground Water District and Magic Valley Ground Water District Providing for Monetary Compensation* (“Second Mitigation Plan”). According to the Ground Water Districts, Rule 43.03.c of the Department’s Rules for Conjunctive Management of Ground and

³ In a November 26, 2008 order (“November 26 Order”), the Director granted Clear Springs’ motion to dismiss the Ground Water Districts’ direct pump-back proposal. “Given the many existing issues and concerns relating to the use of the pump-back alternative as presently proposed by the Ground Water Districts, the Director finds it impractical to expect that these numerous issues and concerns could be adequately explored and addressed to allow for an approvable mitigation plan to be in place within the desired time frame for the 2009 irrigation season.” *November 26 Order* at 4. The direct pump-back proposal was dismissed “without prejudice.” *Id.* The Ground Water Districts’ petition for reconsideration on this point was denied by the Director on January 23, 2009.

Surface Water Resources (“CM Rules”), IDAPA 37.03.11 *et seq.*, authorized the Director to approve a mitigation plan for monetary compensation. The Second Mitigation Plan provided an analysis of the dollar value of water for fish propagation. Additionally, the Second Mitigation Plan stated that the Director should provide credit for continued benefit to the Buhl Gage to Thousand Springs spring reach as a result of CREP and conversion acres.

10. The Second Mitigation Plan was processed by the Department in accordance with the CM Rules and published in the Twin Falls *Times-News* on February 5 and February 12, 2009. Any protests against the Second Mitigation Plan were required to be received by February 23, 2009.

11. On January 29, 2009, the Director, in responding to a motion from the Ground Water Districts for alternative dispute resolution, ordered the Ground Water Districts and Clear Springs to attempt to settle their dispute. *Order on Reconsideration; Second Mitigation Plan; Alternative Dispute Resolution and Vacating Hearing Date*. The settlement was to be moderated by Gerald F. Schroeder, and the parties were to report the results of the mediation to the Director. A letter was submitted to the Director by Mr. Schroeder, stating that the parties participated in negotiations and no settlement was reached.

12. On February 17, 2009, the Ground Water Districts filed their *Notice of Withdrawal of Amended Mitigation Plan* (“Notice of Withdrawal”) with the Director. The Notice of Withdrawal stated the Ground Water Districts’ intent to “withdraw their Amended Mitigation Plan dated September 5, 2008, and their original Mitigation Plan dated June 13, 2008, and cancel all proceedings thereon. . . . It is the Ground Water Districts’ intent to proceed with their Second Mitigation Plan for Monetary Compensation dated December 18, 2008.” *Notice* at 1-2.

13. On February 19, 2009, a status conference was held with attorneys for the Ground Water Districts, Clear Springs, and Blue Lakes Trout Farm, Inc. (“Blue Lakes”). *Order on Status Conference and Providing Briefing Schedule on Second Mitigation Plan for Monetary Compensation* (February 20, 2009). It was decided following the status conference that parties would be given until March 2, 2009, to provide any additional briefing to the Director on his authority “to approve a mitigation plan providing for monetary compensation as an alternative to replacement water supplies in response to a delivery call without approval of the holder of the calling right.” *Id.* at 2.

14. On February 23, 2009, timely protests were received by the Department against the Ground Water Districts’ Second Mitigation Plan from Blue Lakes, Clear Springs, Idaho Aquaculture Association, Inc. (“Idaho Aquaculture”), Rangen, Inc. (“Rangen”), Surface Water Coalition (“SWC”),⁴ and Thousand Springs Water Users Association, Inc. (“TSWUA”). The

⁴ The Surface Water Coalition is made up of the A&B Irrigation District, American Falls Reservoir District No. 2, Burley Irrigation District, Milner Irrigation District, Minidoka Irrigation District, North Side Canal Company, and Twin Falls Canal Company.

protests are similar in nature in that they object to the Ground Water Districts' proposal to provide monetary compensation in lieu of water.

15. In its protest, Clear Springs states that it “reserves the right to supplement this *Protest* Further, Clear Springs, in filing this *Protest*, hereby adopts and incorporates its filings, including expert reports and rebuttals filed in the *First Amended Mitigation Plan* proceedings.” *Clear Springs Foods, Inc.’s Protest to the Ground Water Districts’ Second Mitigation Plan* at 3 (“Clear Springs Protest”). Clear Springs also seeks an award of costs and attorneys’ fees. *Id.* at 4.

16. On February 23, 2009, the Department received the Ground Water Districts’ *Amended Second Mitigation Plan of North Side Ground Water District and Magic Valley Ground Water District Providing for Other Appropriate Compensation* (“Amended Second Mitigation Plan”). The Amended Second Mitigation Plan is identical to the Second Mitigation Plan except that, as an alternative to monetary compensation, the Plan proposes that the Director order the “direct delivery of fish consisting of rainbow trout of the same type, size and timing as could be produced at Clear Springs’ Snake River Farm to replace the lost fish production associated with the 2.0 cfs of reduced flow based upon the actual production records of Clear Springs.” *Amended Second Mitigation Plan* at 10. The Ground Water Districts state that the Director’s authority to order “replacement fish” in lieu of water is based on CM Rule 43.03.c. *Id.*

17. On March 2, 2009, the Ground Water Districts filed a *Motion to Strike Protests Filed by Entities Other than Clear Springs Foods, Inc.* (“Motion to Strike”). The Motion to Strike sought to exclude protests filed by the Blue Lakes, Rangen, SWC, and TSWUA “for lack of any interest or standing.”⁵ *Motion to Strike* at 2.

18. On March 2, 2009, the Director received briefing from Blue Lakes, Clear Springs, SWC, Rangen, and the Ground Water Districts on the issue of monetary compensation in lieu of replacement water, which was identified in the *Order on Status Conference and Providing Briefing Schedule on Second Mitigation Plan for Monetary Compensation*.

19. On March 4, 2009, the Director received supplemental briefing from the Ground Water Districts. *Ground Water Districts’ Supplemental Authority and Comment*.

20. On March 5, 2009, the Director received supplemental briefing from Clear Springs. *Clear Springs Foods, Inc.’s Supplemental Authority*.

21. The complexity associated with administering hydraulically connected ground and surface water sources is evident in the numerous mitigation plans filed by the Ground Water Districts and the resulting protests and associated briefing filed by the holders of potentially impacted surface water rights.

⁵ While not mentioned in the Motion to Strike, a timely protest was filed with the Department by Idaho Aquaculture.

22. As stated in the Final Order, the Department has performed a post-audit of the conversion and CREP actions undertaken by the Ground Water Districts. The 2009 Second Mitigation Plan and Amended Second Mitigation Plan state that conversion and CREP acres are the same as in 2008. The 2008 Mitigation Plan and Amended Mitigation Plan state that conversion and CREP acres are the same as in 2006 and 2007. The 2008 Mitigation Plan states that the “Ground Water Districts will continue to maintain measurement, documentation and accounting of its Mitigation Plan activities on an ongoing basis and will report its water delivery to the Department and the Water District 130 Watermaster so that they may verify and monitor ongoing compliance with this Mitigation Plan.” *Mitigation Plan* at 11.

23. The Department has reviewed the Ground Water Districts’ reporting and has independently reviewed the number of acres enrolled in CREP and the number of conversion acres. Using the ESPA Model, the Department has determined the resulting benefit to the Buhl Gage to Thousand Springs spring reach from those activities.

Conversions	CREP	Total Provided	Required	Shortfall to Reach	Shortfall to Clear Springs
9.44 cfs	0.44 cfs	9.88 cfs	38.72 cfs	28.84 cfs	1.99 cfs

24. In 2009, the final year of the phased-in curtailment period, the Ground Water Districts are required to provide 38.72 cfs to the Buhl Gage to Thousand Springs spring reach, or 2.67 cfs directly to Clear Springs (6.9% of 38.72 cfs). The resulting deficiency is 28.84 cfs to the Buhl Gage to Thousand Springs spring reach and 1.99 cfs directly to Clear Springs. The Ground Water Districts state that the deficiency is to be made up in the form of monetary compensation or replacement fish to Clear Springs.

25. If monetary compensation or replacement fish is not an acceptable form of mitigation, involuntary curtailment could be required to replace the remaining water. Results from the ESPA Model show that in order to provide 28.84 cfs to the Buhl Gage to Thousand Springs spring reach, or 1.99 cfs directly to Clear Springs, it would be necessary to curtail ground water rights junior to November 16, 1972. If curtailment were required, it would impact approximately 860 consumptive ground water rights located in Cassia, Gooding, Jerome, Lincoln, Minidoka, and Twin Falls counties. The curtailment would impact approximately 41,000 acres of land irrigated by ground water.

26. Because of the fluid nature of partial decrees issued in the Snake River Basin Adjudication and the processing of transfers by the Department, the results of the ESPA Model that are relied upon by the Director in this order are slightly different than the results cited by the Director in his October 22, 2008 Curtailment Warning Letter and the July 2005 Order. The results from the ESPA Model presented in the above Findings of Fact are based on the best available information and the best available science.

27. In 2007, a mitigation plan was submitted by the Idaho Dairymen’s Association (“IDA”) and approved by the Director to mitigate for ground water depletions caused by its

members. Based on acceptance of the IDA mitigation plan, participating members of the IDA are not subject to curtailment, provided the terms of the plan are being followed.

CONCLUSIONS OF LAW

1. Conclusions of Law set forth in the July 2005 Order, the Recommended Order, and the Final Order, as well as all subsequent orders related thereto, as applicable, are incorporated into this order by reference. All findings of fact in this order later deemed to be conclusions of law are hereby made as conclusions of law.

2. Idaho Code § 42-602, addressing the authority of the Director over the supervision of water distribution within water districts, provides:

The director of the department of water resources shall have direction and control of the distribution of water from all natural water sources within a water district to the canals, ditches, pumps and other facilities diverting therefrom. Distribution of water within water districts created pursuant to section 42-604, Idaho Code, shall be accomplished by watermasters as provided in this chapter and supervised by the director. The director of the department of water resources shall distribute water in water districts in accordance with the prior appropriation doctrine. The provisions of chapter 6, title 42, Idaho Code, shall apply only to distribution of water within a water district.

In addition, Idaho Code § 42-1805(8) provides the Director with authority to “promulgate, adopt, modify, repeal and enforce rules implementing or effectuating the powers and duties of the department.”

3. Idaho Code § 42-603 grants the Director authority to adopt rules governing water distribution. In accordance with chapter 52, title 67, Idaho Code, the Department adopted rules regarding the conjunctive management of surface and ground water effective October 7, 1994. The CM Rules prescribe procedures for responding to a delivery call made by the holder of a senior-priority surface or ground water right against junior-priority ground water rights in an area having a common ground water supply. CM Rule 1.

Ground Water Districts’ Second Mitigation Plan and Amended Second Mitigation Plan

4. Based on the July 2005 Order, curtailment of junior-priority ground water rights in response to the Clear Springs delivery call was phased-in over a period of five years. Involuntary curtailment has not been ordered in the first four years because junior-priority ground water right holders have provided replacement water or filed mitigation plans with the Director.

5. The final year of the five-year phased-in period of curtailment requires junior ground water users to provide 38.72 cfs to the Buhl Gage to Thousand Springs spring reach, or 2.67 cfs of direct replacement water to Clear Springs (6.9% of 38.72 cfs).

6. According to the Second Mitigation Plan, the Ground Water Districts intend to continue the enrollment of the same number of acres in CREP and irrigate the same number of conversion acres as in 2008. *Second Mitigation Plan* at 5. Consistent with the Final Order, the Department has performed a post-audit of the Ground Water Districts' replacement water efforts to the Buhl Gage to Thousand Springs spring reach. Using the ESPA Model, the simulated benefit to the Buhl Gage to Thousand Springs spring reach from those activities is 9.88 cfs, or 0.66 cfs directly to Clear Springs (6.9% of 9.88 cfs). Because the Ground Water Districts are required to provide 38.72 cfs to the Buhl Gage to Thousand Springs spring reach or 2.67 cfs directly to Clear Springs in 2009, the resulting deficiency is 28.84 cfs to the reach, or 1.99 cfs to Clear Springs (6.9% of 28.87 cfs).

7. The Second Mitigation Plan states that the Ground Water Districts intend to make up the deficiency in the form of monetary compensation to Clear Springs. The Ground Water Districts state that the "exact fish production per cfs and net profit per pound of fish can be easily calculated using actual records and standard accounting procedure." *Second Mitigation Plan* at 6. The Ground Water Districts therefore request the Director to order Clear Springs to produce fish production records to establish appropriate monetary compensation.

8. The portion of the Ground Water Districts' Second Mitigation Plan that requests the Director to order Clear Springs to accept monetary compensation in lieu of water is based on the Ground Water Districts' interpretation of the phrase "other appropriate compensation" in CM Rule 43.03.c. CM Rule 43 states as follows:

03. **Factors to be Considered.** Factors that may be considered by the Director in determining whether a proposed mitigation plan will prevent injury to senior rights include, but are not limited to, the following:

....

c. Whether the mitigation plan provides replacement water supplies *or other appropriate compensation* to the senior-priority water right when needed during a time of shortage even if the effect of pumping is spread over many years and will continue for years after pumping is curtailed. A mitigation plan may allow for multi-season accounting of ground water withdrawals and provide for replacement water to take advantage of variability in seasonal water supply. The mitigation plan must include contingency provisions to assure protection of the senior-priority right in the event the mitigation water source becomes unavailable.

Emphasis added.

9. The Ground Water Districts state that a basis for requesting the Director to compel Clear Springs to accept monetary compensation is their belief that Clear Springs will not accept "any type of replacement water the Ground Water Districts could provide to Clear Springs that would satisfy Clear Springs' concerns." *Second Mitigation Plan* at 7. "Above the rim solutions appear to be the only solutions acceptable to Clear Springs because of its water quality

concerns. Yet, such solutions simply do not result in the necessary water to the reach or to Clear Springs. While there is abundant water below the rim to provide to Clear Springs directly from the Snake River, for example, solutions below the rim are not acceptable because of water quality issues.” *Ground Water Districts’ Objections and Brief in Support of Mitigation Plan Providing for “Other Appropriate Compensation”* at 17-18 (“Brief in Support of Mitigation Plan”).

10. The Director’s authority to approve a mitigation plan in a conjunctive administration delivery call is predicated upon the ability of junior ground water users to provide a supply of water to the senior that replaces the juniors’ depletion. If junior ground water users can demonstrate that the proposed mitigation plan will replace their depletions with water for the senior’s intended beneficial use, the Director may approve the mitigation plan even if the holder of the senior-priority water right objects.

11. The basis for the Director’s authority to approve a mitigation plan over the objection of a senior is rooted in the principle that priority of right should be protected but that the exercise of the right may not block the full utilization of the resource, thereby resulting in monopolization and waste. Idaho Const. Art. XV, §§ 1, 3, and 7; Idaho Code §§ 42-101, -226; CM Rule 20.03; *Schodde v. Twin Falls Canal Co.*, 224 U.S. 107, 120-122 (1911); *American Falls Res. Dist. No. 2 v. Idaho Department of Water Resources*, 143 Idaho 862, 877, 154 P.3d 433, 448 (2007). Under the scenario mentioned above, priority of right is protected through the juniors’ replacement of their depletions. Full utilization of the resource is ensured and monopolization is prevented by allowing juniors to replace depletions, even if the replacement water is objected to by the senior. A senior may not block the full economic development of the State’s water resources if junior ground water users can mitigate their depletions in-time and in-place.

12. Clear Springs argues that the Ground Water Districts’ February 17, 2009 voluntary Notice of Withdrawal of their Mitigation Plan and Amended Mitigation Plan should be with prejudice. *Clear Springs Foods, Inc.’s Briefing on the Director’s Authority to Approve a Mitigation Plan for Monetary Compensation* at 24. If the Director were to accept the Notice of Withdrawal with prejudice, the result would be the removal of sources of direct replacement water to Clear Springs. The Ground Water Districts’ Notice of Withdrawal is approved without prejudice. This is consistent with the Director’s treatment of the Ground Water Districts’ direct pump-back proposal in the November 26 Order. If the Ground Water Districts can mitigate their depletions with water to Clear Springs, the Director should not prevent the Ground Water Districts from pursuing such options in the future.

13. The Ground Water Districts argue that CM Rule 43.03.c allows the Director to compel a senior to accept monetary compensation in lieu of replacement water. “There is nothing in the language that limits the Director’s discretion or defines what ‘other appropriate compensation’ means. The only logical conclusion is that ‘other appropriate compensation’ means money, or in this case money or fish” *Brief in Support of Mitigation Plan* at 7. The Ground Water Districts’ interpretation is incorrect.

14. The phrase “other appropriate compensation” was included in CM Rule 43.03.c for narrow purposes. If injury is found in a ground water to ground water delivery call and it is determined that reasonable pumping levels have been exceeded or that the right is not excepted under the Ground Water Act,⁶ CM Rule 43.03.c authorizes the Director to approve a mitigation plan that proposes to pay a senior right holder the cost associated with deepening a well and increased pumping costs, thereby providing access to water. *Parker v. Wallentine*, 103 Idaho 506, 512, 650 P.2d 648, 654 (1982). Another instance could occur if a senior rented storage water equal to the amount of injury determined by the Director to be attributable to junior ground water depletions. Rather than ordering an additional supply of water to be provided, it would be appropriate for the Director to order the junior to reimburse the senior’s cost incurred in securing the water. Another reason is to allow the Director to approve mutually agreed upon forms of mitigation, such as monetary compensation. Had the Ground Water Districts and Clear Springs agreed that monetary compensation was an appropriate form of compensation, the Director could have approved the entirety of the Second Mitigation Plan; however, they have not and that portion of the Plan must be denied in the absence of an agreement presented.

15. Except in limited circumstances, the Director would exceed his statutory authority under Idaho Code § 42-602 if he were to compel a senior to accept monetary compensation. *American Falls* at 872, 154 P.3d at 443.⁷ Despite the Ground Water Districts’ argument to the contrary, *Brief in Support of Mitigation Plan* at 5-6, a rule cannot provide more authority than authorized by statute. *Holly Care Center v. State, Dept. of Employment*, 110 Idaho 76, 78, 714 P.2d 45, 47 (1986). Otherwise requiring a senior to accept monetary compensation while the junior continues to divert and deplete the resource would violate the priority of right principle of the prior appropriation doctrine. Idaho Const. Art. XV, § 3.⁸ Unless mutually agreed upon, forced monetary compensation must result in water or access to water for the senior.

⁶ Idaho Code §§ 42-226 through -229.

⁷ It is noteworthy that in the litigation surrounding the constitutionality of the CM Rules before the Honorable Barry Wood of the Fifth Judicial District (Case No. CV-2005-600), the Surface Water Coalition, which has filed a protest to the Ground Water Districts’ Second Mitigation Plan, argued that one of the facial infirmities of CM Rule 43.03.c was it would “allow the Director to ignore priority and even permit junior ground water right holders to ‘buy’ their way out of curtailment” *Memorandum in Support of Plaintiff’s Motion for Summary Judgment* at 34 (October 14, 2005). The Department responded to this argument by stating that CM Rule 43.03.c was not facially unconstitutional because “there is no requirement that the Director accept such a proposal [for monetary compensation]” *Defendants’ Memorandum in Response to Motions for Summary Judgment* at 52 (December 6, 2005). It was further argued that at least one permissible application of CM Rule 43.03.c under the prior appropriation doctrine, as established by Idaho law, would be the Director’s approval of monetary compensation by a junior ground water user to a senior ground water user to mitigate for a change in “method or means of diversion necessitated by a junior ground water use . . . *Parker* at 512, 650 P.2d at 654.” *Id.* The CM Rules were deemed facially constitutional by the Idaho Supreme Court in *American Falls*. On pages 10 and 11 of their *Brief in Support of Mitigation Plan*, the Ground Water Districts refer to these proceedings and quote a portion of the above-identified statement from the Surface Water Coalition. The Ground Water Districts do not, however, mention the Department’s response, or their own response to the Surface Water Coalition’s argument: “No where do the Rules speak to cash mitigation. . . . The mitigation provisions of the Rules in no way suggest that money can be imposed as mitigation.” *Clear Springs Foods, Inc.’ Supplemental Authority* at 2 citing *IGWA’s Memorandum in Response to Plaintiff’s Motions for Summary Judgment* at 45 (December 6, 2005).

⁸ The Ground Water Districts argue that the language of CM Rule 43.03.c is plain and unambiguous and that the drafts of CM Rule 43.03.c make it clear that monetary compensation was intended as a form of mitigation to the

16. Clear Springs correctly asserts that it and the Ground Water Districts could still “negotiate an agreeable form of mitigation for the material injury . . . [and] the Director could approve a non-water mitigation plan so long as the parties agreed to its terms.” *Clear Springs Foods, Inc.’s Briefing on the Director’s Authority to Approve a Mitigation Plan for Monetary Compensation* at 23.

17. The Ground Water Districts’ Amended Second Mitigation Plan is identical to the Second Mitigation Plan with the exception that it offers the delivery of “replacement fish” to Clear Springs in lieu of water. *Amended Second Mitigation Plan* at 10. The Ground Water Districts’ base this argument on their interpretation of CM Rule 43.03.c. As stated above, the Director has limited authority to approve mitigation plans that do not propose to mitigate a senior’s injury with something other than water. While Clear Springs does raise fish for commercial sale, the Director would exceed his statutory authority if he were to order Clear Springs to accept replacement fish in lieu of water.

18. Because the Ground Water Districts’ request to provide monetary compensation or replacement fish is denied, neither the Second Mitigation Plan nor Amended Second Mitigation Plan meet the requirements of the final year of the phased-in period of curtailment. Curtailment is therefore noticed to occur on March 16, 2009. As the current shortfall to the Buhl Gage to Thousand Springs spring reach is presently 28.87 cfs, or 1.99 cfs directly to Clear Springs (6.9% of 28.87 cfs), water rights junior to November 16, 1972 will be ordered curtailed unless further actions are taken by March 12, 2009. The resulting curtailment will impact approximately 860 consumptive ground water rights located in Cassia, Gooding, Jerome, Lincoln, Minidoka, and Twin Falls counties. The curtailment will impact approximately 41,000 acres of land irrigated by ground water.

19. Attached hereto as Attachment 1 is a map of the curtailment area; Attachment 2 is a list of the impacted water rights.

20. IDA members participating in its mitigation plan will not be subject to curtailment.

Clear Springs’ Request for Costs and Attorneys’ Fees

21. Clear Springs seeks an award of costs and attorneys’ fees “incurred as a result of being burdened by responding to the *First Amended Mitigation Plan*, which was subsequently withdrawn without merit, and having to defend its water rights against a Money Plan that has been submitted without foundation.” *Clear Springs Protest* at 4. Clear Springs cites no authority in support of its request in its Protest. Clear Springs presents no argument or citation to

holders of senior-priority water rights. *Brief in Support of Mitigation Plan* at 11-12. Even if the drafts of CM Rule 43.03.c could be read to support the Ground Water Districts’ position, only the rule itself is controlling. Because of the legal requirement that a rule cannot provide more authority than a statute, *Holly Care Center* at 78, 714 P.2d at 47, and that a rule must be construed, if possible, to comport with the constitution, *American Falls* at 869, 154 P.3d at 440, the Ground Water Districts’ argument must fail.

authority regarding its request for an award of costs and attorneys' fees in its March 2, 2009 briefing regarding the Director's authority to compel the holder of a senior-priority water right to accept monetary compensation in lieu of replacement water.

22. The Director's authority to award attorneys' fees is based on Idaho Code § 12-117. Idaho Code § 12-117 states that the Director may award attorneys' fees in a "proceeding involving as adverse parties a state agency, a city, a county or other taxing district and a person . . ." A preliminary issue is whether title 42, chapter 52 ground water districts are taxing districts. If not, the statutory provision does not apply and the Department has no authority to award attorneys' fees. Pursuant to Idaho Code § 42-5232, ground water districts are limited to collecting assessments from their members to "pay a proportionate share of the total of all amounts to be assessed . . . which share shall be based on the ratio which the quantity of water the water user is authorized to appropriate under the member's ground water right(s) bears to the total quantity of water authorized for appropriation under the ground water rights of all water users in the district . . ." Ground water districts have authority to levy assessments based upon a proportionate share of the district benefits received, but do not possess authority to levy taxes against the lands of the district as a "forced contribution by the public at large to meet public needs." See *Brewster v. City of Pocatello*, 115 Idaho 502, 505, 768 P.2d 765, 768 (1988) (distinguishing between a "fee" and a "tax").⁹ Secondly, a party claiming attorneys' fees must assert the specific statute, rule, or case authority for its claim. *Stevens v. Stevens*, 135 Idaho 224, 229-30, 16 P.3d 900, 905-06 (2000). A party who fails to cite an applicable rule or statute in support of the claim is not entitled to an award of costs and attorneys fees. *Id.*

23. Because a ground water district does not collect taxes and is therefore not a "taxing district," the Director cannot order attorneys' fees in accordance with Idaho Code § 12-117. In addition, Clear Springs has cited no authority in support of its motion for costs and attorneys' fees and its motion is therefore denied.

24. As stated by the Court in *American Falls*, administration of hydraulically connected ground and surface water sources is complex and requires a technical understanding of the spatial and temporal integration of priorities. 143 Idaho at 877, 154 P.3d at 448. The filing of CM Rule 43 mitigation plans is a new area of law in these proceedings. As evidenced by the numerous mitigation plans proposed by the Ground Water Districts and subsequently filed protests and associated briefing by holders of surface water rights, the parties' understanding of CM Rule 43 is unsettled. The actions of the Ground Water Districts were neither frivolous nor without merit and Clear Springs' motion for costs and attorneys' fees is denied. *Allen v. Blaine County*, 131 Idaho 138, 143, 953 P.2d 578, 583 (1998).

⁹ "There is a distinction between public improvements, which benefit the entire community, and local improvements, which benefit particular real estate or limited areas of land. The latter improvements are usually financed by means of special, or local, assessments. These assessments are, in a certain sense, taxes. But an assessment differs from a general tax in that an assessment is levied only on property in the immediate vicinity of some local municipal improvement and is valid only where the property assessed receives some special benefit differing from the benefit that the general public enjoys." Black's Law Dictionary (8th ed. 2004) citing Robert Kratovil, *Real Estate Law* 465 (6th ed. 1974).

Ground Water Districts' Motion to Strike

25. The Ground Water Districts argue in their Motion to Strike that protests filed by entities other than Clear Springs must be stricken by the Director “for lack of any interest or standing.” *Motion to Strike* at 2. The Ground Water Districts state that Blue Lakes, Rangen, SWC, and TSWUA do not meet the definitional requirement of being a “Protestant” under IDAPA 37.01.01.155 (“Rule 155”). The Ground Water Districts state that the interests of those other than Clear Springs are “generalized . . . [and] are not enough to qualify as protestants and are nearly identical to the issues raised by Clear Springs Foods, Inc. in its protest. Furthermore, these generalized or non-existent interests show that these entities do not have legal standing to participate in this matter either.” *Motion to Strike* at 4.

26. Rule 155 defines a “Protestant” as follows: “Persons who oppose an application or claim or appeal and who have a statutory right to contest the right, license, award or authority sought by an applicant or claimant or appellant are called ‘protestants.’” Here, timely protests were filed by Blue Lakes, Idaho Aquaculture, Rangen, SWC, and TSWUA against the Second Mitigation Plan. The protests and associated briefing argue that the Director is without authority to compel the holder of a senior water right to accept monetary compensation in lieu of water.

27. Under Idaho law, parties who can demonstrate that they have a property interest that may be affected by the issuance or denial of a permit authorizing development have a right to challenge the administrative action. *Evans v. Teton County*, 131 Idaho 71, 75-76, 73 P.3d 84, 88-89 (2003); *City of Burley v. McCaslin Lumber Co.*, 107 Idaho 906, 908, 693 P.2d 1108, 1110 (Ct. App. 1984). The Director disagrees with the Ground Water Districts that Blue Lakes, Idaho Aquaculture, Rangen, SWC, and TSWUA do not have sufficient interests to participate in this matter. Blue Lakes, Idaho Aquaculture, Rangen, SWC, and TSWUA are each holders of surface water rights that could be directly impacted by the Director’s decision on the Ground Water Districts’ request to compel Clear Springs to accept monetary compensation in lieu of replacement water. The Ground Water Districts’ Motion to Strike is therefore denied.

ORDER

Based upon the foregoing, IT IS HEREBY ORDERED as follows:

1. That the Ground Water Districts’ Notice of Withdrawal of Amended Mitigation Plan is GRANTED without prejudice.
2. That the Ground Water Districts’ proposal for monetary compensation in the Second Mitigation Plan is DENIED. The Ground Water Districts’ proposal for replacement fish in the Amended Second Mitigation Plan is DENIED. The Ground Water Districts’ proposal to continue the enrollment of the same number of acres in CREP and irrigate the same number of conversion acres as in 2008 is GRANTED.

3. IT IS FURTHER ORDERED that Clear Springs' request for costs and attorneys' fees is DENIED.

4. IT IS FURTHER ORDERED that the Ground Water Districts' Motion to Strike is DENIED.

5. IT IS FURTHER ORDERED that this is a FINAL ORDER of the agency. The order is final as to paragraphs 1, 2, 3, and 4 above. Any party may file a petition for reconsideration of this final order within fourteen (14) days of the service date of this order. The agency will dispose of the petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law pursuant to Idaho Code § 67-5246.

6. IT IS FURTHER ORDERED that pursuant to sections 67-5270 and 67-5272, Idaho Code, any party aggrieved by this final order may appeal the final order to district court by filing a petition in the district court of the county in which a hearing was held, the final agency action was taken, the party seeking review of the order resides, or the real property or personal property that was the subject of the agency action is located. The appeal must be filed within twenty-eight (28) days: (a) of the service date of the final order; (b) of an order denying petition for reconsideration; or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration, whichever is later. See Idaho Code § 67-5273. The filing of an appeal to district court does not in itself stay the effectiveness or enforcement of the order under appeal.

NOTICE OF CURTAILMENT

Notice of Curtailment is hereby given to holders of ground water rights that are junior to November 16, 1972. The resulting curtailment will impact approximately 860 ground water rights located in Cassia, Gooding, Jerome, Lincoln, Minidoka, and Twin Falls counties. The curtailment will impact approximately 41,000 acres of land irrigated by ground water. If no further actions are taken by March 12, 2009, the Director will order curtailment on March 16, 2009. The watermaster for water district nos. 130 and 140 is directed to notify holders of certain junior-priority ground water rights located in water district nos. 130 and 140, listed in the attachment to this order, and bearing priority dates junior to November 16, 1972, that their rights are subject to curtailment in accordance with the terms of this order. The notice shall apply to consumptive ground water rights for agricultural, commercial, industrial, and municipal uses, excluding ground water rights use for *de minimis* domestic purposes where such domestic use is within the limits of the definition set forth in Idaho Code § 42-111 and ground water rights used for *de minimis* stock watering where such stock watering use is within the limits of the definitions set forth in Idaho Code § 42-1401A(12), pursuant to IDAPA 37.03.11.020.11. Members of the IDA participating in its mitigation plan shall not be subject to curtailment.

DATED this 5th day of March 2009.

DAVID R. TUTHILL, JR.
Director
