Subject: Application for Permit **63-32499**

Dear Dan,

Enclosed is a copy of a letter we received from IDEQ concerning the above captioned application for permit. I've also included a copy of the letter from SPF soliciting comments from IDEQ concerning the potential water use under the application.

It is unclear from the letter whether IDEQ forwarded a copy of their comments to IDWR. In addition, the comments do not appear to address any specific issue concerning the application. SPF will continue to work with the applicant to develop a PWS that meets the requirements of IDEQ.

Let me know if there are any questions concerning this correspondence.

Sincerely,

Roxanne Brown
Water Rights Specialist
