Subject: RE: M3 Eagle Application 63-32573 with Storage

Steve,

Can we consider adding the following condition to the permit?

This water right does not authorize construction of a dam.

Thank you,
Cynthia

Subject: M3 Eagle Application 63-32573 with Storage

Cynthia:

This application for a large 30 year municipal project in Eagle foothills seeks ground water from 200-650 ft. But includes up to about 1800 af storage in numerous excavated ponds to cover about 100 acres of land. Applicant does not want to capture any surface water in the ponds. Apparently there is not shallow ground water to be intercepted by the ponds. Will divert from wells to ponds & probably involves some reclaimed/treated effluent from this system for re-use etc.

No dams proposed.

Not much detail provided about the proposed ponds.

Denise will have the application available for your comments by about April 28 through late May.

Attached draft legal notice gives you an idea of what's up. Let me know if you have any questions or concerns. Thanks

Steve
