Allan,

It looks as though the most up-to-date irrigated lands files are on the ESHMC website: (http://www.idwr.idaho.gov/WaterInformation/Projects/espam/d/model_files/Version_2.0_Development/Current_Data/IRRLANDS_ROUND2_20100422/)

Bryce,

I had told Allan over the phone that IESW031 and IESW041 were folded into IESW000 and that IESW007 and IESW054 essentially became IESW059. These are really the only major changes with the entities, is that right? I can't think of anymore at the moment.

I think you're right.

I had told Allan the same things about a week ago....

Bryce

I will see what I can do with the 92 shape. I was attempting to use (http://www.idwr.idaho.gov/WaterInformation/Projects/espam/d/model_files/Version_2.0_Development/Current_Data/Surface%20Water%20entities/) Should I move it to superseded data?

Allan

Yes, that should probably go to the superceded folder given the 3-31-2009 date.
