

# Status of the Final Report for ESPAM2.0

ESHMC Meeting

June 22, 2012

Presented by Stacey Taylor

# Figures in the Final Report

- IWRRI is near completion on their figures
- Allan has provided all of his figures and has supplied necessary shapefiles for other figures
- Water level contour maps needed from IDWR
- The total water budget figure is not yet complete
- Captions need to be completed and then proof-read
- Figures will be sent on to IDWR for review

# Text in the Final Report

- Nothing has changed since the last round of reviewing
- What's next:
  1. Find the most recent copy (last one edited?) of the final report and compile all the sections
  2. Update the figure numbering in the text (some figures have been added/removed)
  3. Send on the report to IDWR and ESHMC for comments

**Questions?**
