

**NOTICE OF FILING SUPPLEMENTAL REPORTS
FOR REPORTING AREA 1 (IDWR BASIN 34) REGARDING
REVISION OF THE FOLLOWING:**

- ▶ **Period of Use (For Irrigation Water Uses)**
- ▶ **Conjunctive Management General Provisions**

EXPLANATION

In response to the Idaho Supreme Court's decision in Basin-wide Issue 5, the Snake River Basin Adjudication (SRBA) District Court requested the Director of the Idaho Department of Water Resources (IDWR) to file supplemental reports for Basin 34 regarding the period of use for irrigation water uses and conjunctive management general provisions. This notice is to inform you that IDWR has filed those reports with the SRBA District Court.

Irrigation Season of Use

The supplemental report on irrigation season of use changes IDWR's recommendation for the irrigation season of use for irrigation water rights in Basin 34. Even water rights that have received partial decrees are receiving a new irrigation season recommendation because the Idaho Supreme Court determined that the use of the term "irrigation season" is not acceptable and specific dates must be set. The irrigation season of use recommendations only affect the season of use, and no other elements of the irrigation water rights.

If you claimed an irrigation water right a description of the Director's irrigation season of use recommendation for your claim is attached to this Notice. You need to carefully review the new season of use recommended for your irrigation right. The complete Irrigation Season of Use Supplemental Report for Basin 34 is available at the SRBA courthouse in Twin Falls and the locations listed on the third page of this notice. Copies of the report can be made, but you may be charged for copying and mailing.

Conjunctive Management General Provisions

Additionally, the Director of IDWR has filed with the SRBA District Court his supplemental report on conjunctive management for Basin 34, along with related provisions regarding the interconnection of water resources within the Snake River Basin. This Report is the Director's recommendation for the conjunctive management general provisions that should be decreed for Basin 34. Attached to this Notice is a complete copy of the conjunctive management general provisions the Director recommends for Basin 34.

INSTRUCTIONS FOR REVIEWING THESE REPORTS

You are free to agree or disagree with the Director's recommendations. If you agree with the Director's recommendations you do not need to do anything, pending further notice as described below. If you disagree with the Director's recommendations, you need to file an objection as described below. **You may only object to the Director's recommendations on irrigation season of use and conjunctive management.** You may not object to any other elements of your water right under this notice unless you have evidence that the irrigation season of use or conjunctive management recommendations affect other elements of your right.

INSTRUCTIONS FOR TAKING AN ISSUE TO COURT

What do I do if I disagree with a conjunctive management provision or a season of use recommendation?

If you disagree with a conjunctive management provision, or the season of use recommendation for your water right or anyone else's water right, and want to be heard in court, file an objection with the SRBA Court. Objections must be made on the standard objection form attached to this Notice. Copies are available from any IDWR office or from the SRBA Court. You may also download a copy of the objection form from the SRBA Web Site at www.srba.state.id.us.

Your objection to IDWR's conjunctive management provision, or the irrigation season of use for the rights listed above must be **received** by the SRBA Court on or before **July 30, 1999**.

What do I do if someone else objects to a conjunctive management provision or a season of use recommendation?

If someone files an objection to a conjunctive management provision, or the season of use recommendation for your water right or anyone else's water right, you may file a response to that objection. Responses to objections must be made on the standard response form available from any IDWR office or from the SRBA Court. Your response must be **received** by the SRBA Court on or before **September 10, 1999**.

What happens if there are no objections to a recommendation?

After the deadline for filing objections, the SRBA Court will hear the uncontested recommendations on **October 19, 1999**, at **1:30 P.M.** at the **SRBA Courthouse**. Any part of the report to which no objections are filed may be decreed by the district court.

How will I know about the proceedings on water right recommendations to which objections were filed?

A notice will be mailed to you for court dates on your water right or for those where you filed an objection or a response. You will not receive notice of court dates on any other water right recommendations. Additional information regarding the SRBA can be found on the SRBA Web Site at www.srba.state.id.us.

Note: The SRBA Court publishes a monthly Docket Sheet listing all objections and responses filed. It does not list court dates for individual water right cases, but provides general information helpful to all participants in the SRBA. The Docket Sheet is available at your county courthouse and all IDWR offices, or you may subscribe by contacting the SRBA Court or IDWR. The annual subscription fee is \$7.50. The Docket Sheet is also available on the SRBA Web Site at www.srba.state.id.us.

ADDITIONAL INFORMATION

If you have questions about the SRBA, public information brochures are available at any IDWR office. You are also welcome to call IDWR at any of its offices or the SRBA Court. You may also want to consider contacting an attorney to assist you.

The director recommends that the following general provisions be included in the decree determining rights to water from Basin 34.

1. The following definitions apply to these provisions:
 - a. The "Howell gage" is a stream gaging station on the Big Lost River located upstream from Mackay Reservoir in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 30, Township 8 North, Range 21 East, B.M.
 - b. The "2-B gage" is a stream gaging station on the Big Lost River located downstream from Mackay Dam in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$, Section 18, Township 7 North, Range 24 East, B.M.
 - c. Mackay Reservoir is "full" when the water surface elevation of the reservoir is at the spillway crest as it was configured on November 19, 1987.
 - d. The "Back Channel" separates from the main channel of the Big Lost River in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Section 5, Township 8 North, Range 22 East, B.M.
 - e. "Basin 34" refers to IDWR Administrative Basin 34 as it is described in the Amended Director's Report Part 1 for Reporting Area 1 (Basin 34) dated December 15, 1995.
 - f. As used in these provisions the term "water rights" refers to water rights as decreed in the case In Re SRBA, Fifth Judicial District Court Case No. 39576.
2. During the time period from November 1 of each year to the beginning of the subsequent irrigation season (the "non-irrigation period"), all or a portion of the water of the Big Lost River flowing into Mackay Reservoir may be diverted for storage under water right nos. 34-00012 and 34-10873 so long as the natural flow in the Big Lost River at the 2-B gage is not less than fifty cubic feet per second. During the non-irrigation period, all other rights to the water of the Big Lost River are subordinate to right nos. 34-00012 and 34-10873, except that natural flow downstream of Mackay Dam not needed to maintain a natural flow of not less than fifty cubic feet per second at the 2-B gage may be diverted for domestic uses and livestock watering under water rights authorized for these purposes during the non-irrigation period.
3. Water rights from the Big Lost River diverted below Mackay Dam and Reservoir may be rotated into storage with the consent of the Big Lost River Irrigation District when such practice improves the efficiency of water use.

Such rotation is subject to the following conditions and review and approval by the Director of the Idaho Department of Water Resources.

- a. Water may only be rotated into storage if it will be beneficially used at the place of use under the water right during the year in which it is stored.
 - b. Rotation into storage cannot occur prior to the reasonable need for irrigation water.
 - c. Rotation into storage can only occur when the water is otherwise deliverable to the place of use under the water right.
 - d. The diversion rate of water rights being rotated into storage shall be included in the calculation of total combined diversion rate limitations.
 - e. If the reservoir fills after water has been rotated into storage, all water in the reservoir at the time it fills becomes storage water of the Big Lost River Irrigation District.
 - f. Any water stored under such rotation that is not used in the same irrigation season in which it is stored shall become storage water of the Big Lost River Irrigation District at the end of the irrigation season.
4. Holders of water rights with points of diversion on the Back Channel shall control the flow of water into the Back Channel as follows:
- a. When the flow of water at the Howell gage is less than 1,400 cubic feet per second, the flow in the Back Channel shall be kept as near as practicable to 150 cubic feet per second.
 - b. When the flow of water at the Howell gage equals or exceeds 1,400 cubic feet per second, the flow in the Back Channel shall be kept as near as practicable to 200 cubic feet per second unless all surface water rights, including water rights with a junior priority, are satisfied.
 - c. The Director of the Idaho Department of Water Resources shall identify a measuring location on the Back Channel where the holders of water rights from the Back Channel shall construct the necessary facilities to measure the flow in the Back Channel to comply with these conditions.

- d. These provisions shall not be considered to enlarge the amount of water to which appropriators diverting from the Back Channel are entitled.
- 5. The following surface water rights from the following sources of water in Basin 34 shall be administered separately from all other surface water rights in Basin 34:

SEE ATTACHMENT A

- 6. The following surface water rights from the Big Lost River and its tributaries upstream of Mackay Reservoir shall be administered separately from all other non-storage, surface water rights from the Big Lost River downstream of Mackay Reservoir during two periods of time as follows:
 - a. From the beginning of the irrigation season until the time on the rising stage of the Big Lost River when the maximum flow at the Howell gage reaches at least 750 cubic feet per second at any time for three consecutive days; and
 - b. After the time on the falling stage of the Big Lost River when the minimum flow recedes to no more than 300 cubic feet per second at any time for three consecutive days until the end of the irrigation season.

SEE ATTACHMENT B

- 7. All water rights within Basin 34 are from connected sources of water in the Snake River Basin and shall be administered conjunctively.

DISTRICT COURT - SRBA
TWIN FALLS CO. IDAHO
FILED

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA)	Subcase No. 91-00005-34
)	
Case No. 39576)	ORDER AMENDING PARTIAL
)	DECREE FOR GENERAL
)	PROVISIONS IN ADMINISTRATIVE
)	BASIN 34 TO INCLUDE GENERAL
)	PROVISION 7 ON CONNECTED
)	SOURCES
)	

I.

PROCEDUAL BACKGROUND

A. On May 9, 2001, Judge Burdick, then presiding, issued an *Order of Partial Decree for General Provisions in Basin 34*. The *Partial Decree* decreed recommended general provisions 1-6 as modified by stipulation of the parties to subcase 91-00005-34. The Director also recommended a General Provision 7 which dealt with the conjunctive administration of connected sources in the entire Snake River Basin.¹

B. Recommended General Provision 7 was separated from subcase 91-00005-34 and consolidated with Basin-Wide Issue 5 which addressed conjunctive management for the entire Snake River Basin. See *Order of Consolidation/Separation of Issues (Realignment and Redesignation of Issues) of Basin-Wide Issues 5, 5A and 5B A01 § 11, Subcases 91-00005, 91-00005A and 91-00005B (In the future: 91-00005-34, 91-00005-36 and 91-00005-57) (Aug 31, 1999)*.

C. On February 27, 2002, Judge Burdick issued a *Partial Decree on Connected Sources (Conjunctive Management)*, which among other things modified the language

¹ The recommended provision provided: "All water rights within Basin 34 are from connected sources of water in the Snake River Basin and shall be administered conjunctively."

recommended in General Provision 7 in Basin 34 as well as for all other administrative basins, as follows:

Except as otherwise specified above, all other water rights within Basin _____ will be administered as connected sources of water in the Snake River Basin in accordance with the prior appropriation doctrine as established by Idaho law.

D. Pursuant to Basin-Wide Issues this general provision applied to all basins within the SRBA. Because the issue was not resolved at the time the general provisions for Basin 34 were initially decreed this language was not included in the *Order of Partial Decree for General Provisions in Basin 34*.

II. ORDER

Because Basin-Wide Issue 5 is complete this Court finds it appropriate to now amend the general provisions for Basin 34 to include the general provision on connected sources rather than by a separate decree. Any opposition to the inclusion of this language was resolved in Basin-Wide Issue 5.

Therefore, IT IS ORDERED that the *Partial Decree* for the general provisions in Basin 34 is amended to include General Provision 7 as set forth in Exhibit A.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

DATED July 7, 2004.

JOHN M. MELANSON
Presiding Judge
Snake River Basin Adjudication

General Provisions 1-7 for Basin 34

The following general provisions apply to rights to water from Basin 34.

1. The following definitions apply to these provisions:
 - a. The "Howell gage" is a stream gaging station on the Big Lost River located upstream from Mackay Reservoir in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 30, Township 8 North, Range 21 East, B.M.
 - b. The "2-B gage" is a stream gaging station on the Big Lost River located downstream from Mackay Dam in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$, Section 18, Township 7 North, Range 24 East, B.M.
 - c. Mackay Reservoir is "full" when the water surface elevation of the reservoir is at the spillway crest as it was configured on November 19, 1987.
 - d. The "Back Channel" separates from the main channel of the Big Lost River in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Section 5, Township 8 North, Range 22 East, B.M.
 - e. "Basin 34" refers to IDWR Administrative Basin 34 as it is described in the Amended Director's Report Part 1 for Reporting Area 1 (Basin 34) dated December 15, 1995.
 - f. As used in these provisions the term "water rights" refers to water rights as decreed in the case In Re SRBA, Fifth Judicial District Court Case No. 39576.
2. During the time period from November 1 of each year to the beginning of the next irrigation season (the "non-irrigation period"), all or a portion of the water of the Big Lost River flowing into Mackay Reservoir may be diverted, according to priority, for storage under water rights nos. 34-00012 and 34-10873 provided the natural flow at the 2-B gage is not less than fifty cubic feet per second. During the non-irrigation period, natural flow water rights downstream of Mackay Dam and senior in priority to water rights numbers 34-00012 and 34-10873 may be diverted for domestic and livestock uses under water rights authorized for these purposes.
3. Water rights from the Big Lost River diverted below Mackay Dam and Reservoir may be rotated into storage with the consent of the Big Lost River Irrigation District when such practice improves the efficiency of water use.

Such rotation is subject to the following conditions and review and approval by the Director of the Idaho Department of Water Resources.

- a. Water may only be rotated into storage if it will be beneficially used at the place of use under the water right during the year in which it is stored.
 - b. Rotation into storage cannot occur prior to the reasonable need for irrigation water.
 - c. Rotation into storage can only occur when the water is otherwise deliverable to the place of use under the water right.
 - d. The diversion rate of water rights being rotated into storage shall be included in the calculation of total combined diversion rate limitations.
 - e. If the reservoir fills after water has been rotated into storage, all water in the reservoir at the time it fills becomes storage water of the Big Lost River Irrigation District.
 - f. Any water stored under such rotation that is not used in the same irrigation season in which it is stored shall become storage water of the Big Lost River Irrigation District at the end of the irrigation season.
 - g. When the river is connected as specified in General Provision No. 6, while a right is rotated into storage, it is subordinate to all rights diverted above Mackay Reservoir with a priority date earlier than October 1, 1936.
4. The Back Channel is a natural channel of the river that has been historically regulated to a maximum of 200 cubic feet per second to provide irrigation water. This provision shall not be considered to enlarge the amount of water to which appropriators diverting from the Back Channel are entitled.
 5. The following surface water rights from the following sources of water in Basin 34 shall be administered separately from all other surface water rights in Basin 34:

SEE ATTACHMENT A

6. The following surface water rights from the Big Lost River and its tributaries upstream of Mackay Reservoir shall be administered separately

from all other non-storage, surface water rights from the Big Lost River downstream of Mackay Reservoir during two periods of time as follows:

- a. From the beginning of the irrigation season until the time on the rising stage of the Big Lost River when the maximum flow at the Howell gage reaches at least 750 cubic feet per second at any time for three consecutive days; and
- b. After the time on the falling stage of the Big Lost River when the minimum flow recedes to no more than 450 cubic feet per second at any time for three consecutive days until the end of the irrigation season.
- c. For purposes of determining the amount of water being supplied to Mackay Reservoir from curtailment of diversions upstream from the reservoir, measurements will be made on the Big Lost River at the Pense Bridge located in the T 8 N, R 23 E, S 30, SW ¼ NE ¼, and on the Donahue Bridge on Parsons Creek located in the T 8 N, R 22 E, S 24, SW ¼ SE ¼. These measurements will be used by the Watermaster to make futile call determinations.

SEE ATTACHMENT B

7. Except as otherwise specified above, all other water rights within Basin 34 will be administered as connected sources of water in the Snake River Basin in accordance with the prior appropriation doctrine as established by Idaho law.
