Chad Peterson	Gary Stevens

**IWRB & IDWR Staff**

Chuck Cuddy (Board Member)  
Dale Van Stone (Board Member)  
Keith Franklin  
Ken Neely  
Morgan Case  
Neeley Miller

**Meeting Summary**

Following introductions the following presentations were made:

- Rathdrum Prairie Future Demand Study – Dr. Mark Solomon, Idaho Water Resources Research Institute
- Rathdrum Prairie Groundwater Pumping Study – Dr. Dale Ralston, Ralston Hydrologic Services, Inc.
- Monitoring Update for the Rathdrum Prairie – Ken Neely, Idaho Department of Water Resources

During and following the presentations, committee members and the audience asked questions and discussed the implications of each topic.

The committee spent a few minutes at the end of the meeting to briefly discuss plans for 2015, including the potential timing for an RP CAMP AC meeting later this year. Potential agenda items mentioned included: a potential follow-up presentation from Mark Solomon on the Integrated Water Resource Management Plan highlighting the need to plan for wastewater in relation to future water use on the RPA, consideration of potential RP CAMP updates, and potential for collaboration with the State of Washington on a bi-state modeling effort. Committee members were encouraged to e-mail Neeley Miller ([Neeley.Miller@idwr.idaho.gov](mailto:Neeley.Miller@idwr.idaho.gov)) with ideas for future meeting dates and agenda items.
