Chuck,

We'll cover your concern about the return flow correction with the posting of the 5<sup>th</sup> CD. Allan is working on that and it will be available soon.

Yes, perhaps not today, given the blazing speed I am experiencing.

There is a 5<sup>th</sup> CD containing updated material. The update as a result of the return flow problem resulted in release of ESPAM1.1, which is available on our web page.

Thanks. I located my copies, so it isn't urgent for me at this point. Allan may want to weigh in on

whether any files from the training should be replaced with more current versions...there was a correction made for a return flow data problem at one point, but I don't recall if that was made prior to the training workshop or later.

We are loading the training CD files on the web page. We'll let you all know when it is ready.

It is not on line, but maybe next week I can work towards doing that.

Due to some turnover I need to bring a couple new people up to speed on ESPAM v1.1. I am having trouble finding the training manual and CDs from the workshop in Idaho Falls and fear it may have left with departing staff. Is this stuff available on-line at IWRRRI somewhere?

Chuck
