March 12, 2008

Tim,

I am writing this letter to formally request your department's help and direction on the following issues as related to Water Districts 37 & 37 M:

- 1.) Compile a list of all surface water Permits and Licenses (excluding Hydro Power) within Basins 37 & 37M that have Conditions of Use with Watermaster authority.
- 2.) Query the list developed by SPF Engineering and organized by Daniel Nelson to show wells that have both ground water and surface water in the same well. (Example 37-7775D with 37-604E or 37-7064E with 37-102b). I'm wondering whether these wells would be allowed to keep running even if the surface priority has be shut off, because the ground water right is not regulated. Or, are the groundwater rights supplemental and should therefore be shut off with the surface water? The list is an excellent tool from which to start, but I'm finding some diversions that need further explanation.
- 3.) Identify total deliveries by priority to the following canals:
 - a.) Bannon 49
 - b.) Baseline #55C
 - c.) Black 61
 - d.) Cove #33
 - e.) District 45
 - f.) Glendale 50
 - g.) Hiawatha #22

I can get the legal description of the PODs when you're ready. My concern with these major diversions is that we may be delivering the incorrect totals due to transfers, splits, etc. I will attach a copy of the current delivery sheet for the District 45 to give an example of what I am looking for.

- 4.) How much of the old "Hiawatha Flood Water" Decree was claimed in the SRBA? The decree numbers are 37-896 thru 37-923. The original decree has some confusing language about priority of delivery. It looks like one of those "saved water" decrees, but I've never delivered it that way. I believe Brockway Engineering claimed a piece of this for Rinker and Co., so I will need some guidance on how this will be delivered.

If you could add these responses to the other twelve issues we have discussed, I would really appreciate it.

Thanks for all of the help. I will be talking to you soon.

Respectfully,

A handwritten signature in black ink, appearing to read "Kevin Lakey", with a long horizontal stroke extending to the right.

Kevin Lakey
Watermaster, Districts 37 & 37M

BANNON DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-29	6/1/1883	2.000		There is 0.12 cfs left in the river for mitigation losses when the transfer moved this right to this location. The maximum allowable diversion rate at the point of diversion is 1.88 cfs. When 37-29, 37-40, 37-41, 37-42, 37-363B, and 364B are combined, they have numerous limitations to the number of acres that can be irrigated. .	This right allows the same diversion as the recommendation, however, the mitigation water is silent on the water right side	1.880	1.880
37-40	6/1/1891	0.300		When 37-29, 37-40, 37-41, 37-42, 37-363B, and 364B are combined, they have numerous limitations to the number of acres that can be irrigated. .	There is no difference between water right and recommendation.	0.300	0.300
37-41	6/1/1887	1.200		When 37-29, 37-40, 37-41, 37-42, 37-363B, and 364B are combined, they have numerous limitations to the number of acres that can be irrigated. .	There is no difference between water right and recommendation.	1.200	1.200
37-42	6/1/1891	2.600		When 37-29, 37-40, 37-41, 37-42, 37-363B, and 364B are combined, they have numerous limitations to the number of acres that can be irrigated. .	There is no difference between water right and recommendation.	2.600	2.600
37-363B	4/12/1883	1.730		There is 0.10 cfs left in the river for mitigation losses when the transfer moved this right to this location. The maximum allowable diversion rate at the point of diversion is 1.63 cfs. When 37-29, 37-40, 37-41, 37-42, 37-363B, and 364B are combined, they have numerous limitations to the number of acres that can be irrigated. .	The water right for 37-363B allows a diversion rate of 2.16 cfs. The adjudication records allow a diversion under 37-363B of 1.73 cfs and under 37-20703 of 0.43 cfs. When totalled these equal the water rights side of 2.16 cfs. In both of these rights only a porportionate share can be diverted at the headgate, the remainder is to stay in the river for mitigation. 4.03 cfs can be diverted under this right on the water right side, and .13 cfs is to remain in the river for mitigation .	2.16 cfs - .13 cfs mitigation water = 2.03 cfs	2.160
37-20703	5/1/1887	0.430		There is 0.03 cfs left in the river for mitigation losses when the transfer moved this right to this location. The maximum allowable diversion rate at the point of diversion is 0.40 cfs.	The water right for 37-363B allows a diversion rate of 2.16 cfs. The adjudication records allow a diversion under 37-363B of 1.73 cfs and under 37-20703 of 0.43 cfs. When totalled these equal the water rights side of 2.16 cfs. In both of these rights only a porportionate share can be diverted at the headgate, the remainder is to stay in the river for mitigation. 4.03 cfs can be diverted under this right on the water right side, and .13 cfs is to remain in the river for mitigation .		
37-364B	5/1/1887	1.200		There is 0.07 cfs left in the river for mitigation losses when the transfer moved this right to this location. The maximum allowable diversion rate at the point of diversion is 1.13 cfs. When 37-29, 37-40, 37-41, 37-42, 37-363B, and 364B are combined, they have numerous limitations to the number of acres that can be irrigated. .	0.7 cfs is left in the river on this right for mitigation and only 1.13 cfs can be diverted in the headgate. There is no difference between water right and recommendation.	1.20 cfs - 0.7 cfs mitigation water = 1.13 cfs	1.130

BANNON DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-21727	5/1/1887	0.330		There is 0.02 cfs of this right left in the river for mitigation losses The delivery at the headgate is limited to 0.31 cfs.	Water right 37-364C was split in the Adjudication into two water rights 37-21727 aand 37-21728. The recommendations for these two rights are identical to the water right record. The water right record allows 0.64 cfs, but 0.04 cfs of that rate is to stay in the river for mitigation. Only 0.60 cfs can be diverted at the headgate. Deliver these rights as recommended for billing purposes.	0.64 cfs - 0.04 cfs mitigation watre = 0.60 cfs delivered at headgate	0.310
37-21728	5/1/1887	0.310		There is 0.02 cfs of this right left in the river for mitigation losses The delivery at the headgate is limited to 0.29cfs.	Water right 37-364C was split in the Adjudication into two water rights 37-21727 aand 37-21728. The recommendations for these two rights are identical to the water right record. The water right record allows 0.64 cfs, but 0.04 cfs of that rate is to stay in the river for mitigation. Only 0.60 cfs can be diverted at the headgate. Deliver these rights as recommended for billing purposes.	see 37-21727 above	0.290
37-43B	6/1/1891	0.820		Aparently water right 37-43 was split by a tansfer. This allowed the property owner to deliver a portion of their water through the Bannon canal and a portion through the Glendale canal. They have altered the amount of water being diverted from the Bannon Canal through the SRBA recommendation, but no transfer has been filed to change the water right.	Whereas a transfer was filed to change the delivery practices to the way they were recommended in the SRBA the watermaster is obligated to continue delivering the water as shown on the water rights in 37-43B in the water rights database until the recommendation has been decreed. This right also has a channel loss requirement of 0.12 cfs. Therefore, only 0.26 cfs can be diverted at the Bannon Canal.	0.38 - 0.12 channel losses = 0.26 cfs.	0.260
37-302B	6/1/1891	1.450		This was recommended the same as the water right database	Same as water right database	1.450	1.450
37-21121	6/10/1887	2.400		This right was recommended to reflect water right 37-478.	This right is recommended with the same diversion rate as water right 37-478, so deliver as recommended.	2.400	2.400
37-21122	6/10/1887	1.200		This right was recommended to reflect a portion of water right 37-479.	A transfer split water right 37-479 and some of the details were lost, so the rights were renumbered. The other portion of this water right was moved to anoth point of diversion through a transfer. Therefore, use the recommended diversion rate for delivery.	1.200	1.200
TOTAL WATER DELIVERED TO THE BANNON CANAL AT FULL FLOWS IS -->							15.180

BASELINE 55C CANAL DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	DELIVERY INTO BASELINE 55C CANAL
37-113H	7/10/2008	0.700		This recommended as recorded in the water right database. 0.06 cfs of this right is for channel losses, only 0.64 cfs can be diverted at the headgate, the remainder should remain in the Big Wood or in the Bypass Canal channel	Same as recommendation.	0.700	0.640
37-115D	6/12/1886	2.000		This recommended as recorded in the water right database. 0.10 cfs of this right is for channel losses, only 1.90 cfs can be diverted at the headgate, the remainder should remain in the Big Wood or in the Bypass Canal channel	Same as recommendation.	2.000	1.900
37-436C	6/1/1901	1.000		This right was split from water rights 37-436A and/or 37-436B in the water right portion of the database. The diversion rate applied is to be measured at the Baseline 55C canal headgate	This right was originally split through a court case, and is a decreed right. The original decree was for 12.91 cfs for 37-436A and 1.09 cfs for 37-436B for a total of 14.00 cfs, which matches the combined amounts of SRBA recommendations 37-436C, 37-436E, 37-436F, 37-436G, 37-11749, 37-11779, 37-11820, and 37-11997.. This right has been split several times in the adjudication by ownership changes, but the combined amount of the adjudication splits match the combined amounts of the water rights, therefore the full 14.00 cfs can be delivered if it is requested per the SRBA recommendations.	14.000	14.000
37-436E	6/1/1901	1.970		This right was split from water rights 37-436A and/or 37-436B in the water right portion of the database. The diversion rate applied is to be measured at the Baseline 55C canal headgate	This right was originally split through a court case, and is a decreed right. The original decree was for 12.91 cfs for 37-436A and 1.09 cfs for 37-436B for a total of 14.00 cfs, which matches the combined amounts of SRBA recommendations 37-436C, 37-436E, 37-436F, 37-436G, 37-11749, 37-11779, 37-11820, and 37-11997.. This right has been split several times in the adjudication by ownership changes, but the combined amount of the adjudication splits match the combined amounts of the water rights, therefore the full 14.00 cfs can be delivered if it is requested per the SRBA recommendations.	See 37-436C above	0.000

The combined diversion rate for all of these rights is 0.01 cfs less than the original water rights, but this discrepancy can be contributed to rounding of these small diversion rate splits. The diversion rate applied is to be measured at the Baseline 55C canal headgate. Water rights 37-210, 37-11816, 37-11817, 37-11818, 37-11819 and 37-11820 are limited to 102 acres of irrigation in a single irrigation season.	This right was originally split through a court case, and is a decreed right. The original decree was for 0.46 cfs for 37-433A and 0.04 cfs for 37-433B for a total of 0.50 cfs, which very close to the combined amounts of SRBA recommendations 37-433D, 37-433E, 37-433F, 37-433G, 37-11752, 37-11773, 37-11817, and 37-11994.. This right has been split several times in the adjudication by ownership changes, but the combined amount of the adjudication splits is very close to the combined amounts of the water rights, therefore the full 0.50 cfs can be delivered if it is requested per the water rights until the SRBA recommendations are decreed.	See 37-433D above	0.000
37-11994	4/17/1883	0.080		This right was split from water rights 37-433A and/or 37-433B in the water right portion of the database. The combined diversion rate for all of these rights is 0.01 cfs less than the original water rights, but this discrepancy can be contributed to rounding of these small diversion rate splits. The diversion rate applied is to be measured at the Baseline 55C canal headgate	This right was originally split through a court case, and is a decreed right. The original decree was for 0.46 cfs for 37-433A and 0.04 cfs for 37-433B for a total of 0.50 cfs, which very close to the combined amounts of SRBA recommendations 37-433D, 37-433E, 37-433F, 37-433G, 37-11752, 37-11773, 37-11817, and 37-11994.. This right has been split several times in the adjudication by ownership changes, but the combined amount of the adjudication splits is very close to the combined amounts of the water rights, therefore the full 0.50 cfs can be delivered if it is requested per the water rights until the SRBA recommendations are decreed.	See 37-433D above	0.000
37-20571	3/24/1883	0.770		Water rights 37-20570, 37-20571, 37-20572, 37-20573, 37-20574, 37-20575, 37-20576, 37-20577, 37-20578, 37-20579, 37-20580, 37-20581, 37-20582, 37-20583, 37-20585, 37-20586, and 37-20593 have numerous conditions that limit the amount of land that can be irrigated and the amount water that can be diverted at the field headgate. All of these rights are diverted from the Baseline canal except for 37-20570, 37-20577, and 37-20593, which are diverted through the Ditto Ditch. The various combinations are too lengthy to describe in this spreadsheet, so the watermaster is going to need to review the conditions on these rights to prevent enlargement of the three parcels described by these water rights.	This right is portion of water right 37-30000J. This water right has been manipulated several times by transfers and the SRBA. The base flow rate still remains constant, so deliver per the recommendation.	1.060	0.770
37-20572	3/24/1883	0.060		Water rights 37-20570, 37-20571, 37-20572, 37-20573, 37-20574, 37-20575, 37-20576, 37-20577, 37-20578, 37-20579, 37-20580, 37-20581, 37-20582, 37-20583, 37-20585, 37-20586, and 37-20593 have numerous conditions that limit the amount of land that can be irrigated and the amount water that can be diverted at the field headgate. All of these rights are diverted from the Baseline canal except for 37-20570, 37-20577, and 37-20593, which are diverted through the Ditto Ditch. The various combinations are too lengthy to describe in this spreadsheet, so the watermaster is going to need to review the conditions on these rights to prevent enlargement of the three parcels described by these water rights.	This right is portion of water right 37-30000J. This water right has been manipulated several times by transfers and the SRBA. The base flow rate still remains constant, so deliver per the recommendation.	see 37-20571 above	0.050
37-20573	3/24/1883	0.230		Water rights 37-20570, 37-20571, 37-20572, 37-20573, 37-20574, 37-20575, 37-20576, 37-20577, 37-20578, 37-20579, 37-20580, 37-20581, 37-20582, 37-20583, 37-20585, 37-20586, and 37-20593 have numerous conditions that limit the amount of land that can be irrigated and the amount water that can be diverted at the field headgate. BASELINE 55C CANAL DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	DELIVERY INTO BASELINE 55C CANAL
37-22040	3/24/1883	0.040		This is a ground water right that is mitigate by diverting water rights 37-22026, 37-22027, 37-22028, 37-22029, 37-22030, 37-22031, 37-22032, 37-22033, 37-22034, 37-22035, 37-22036, 37-22037, 37-22038, 37-22039, 37-22040 and 37-22041 into the Bypass canal or the Dittoe Ditch. Diversion of ground water is limited to those times water is available for diversion under these rights and the ground water will be regulated by the watermaster. When these rights are combined the use of ground water under these rights shall not exceed a total diversion rate of 0.56 cfs and a total annual diversion volume of 98.0 af at the well head and shall not exceed the irrigation of 28 acres.	Water rights 37-22026, 37-22027, 37-22028, 37-22029, 37-22030, 37-22031, 37-22032, 37-22033, 37-22034, 37-22035, 37-22036, 37-22037, 37-22038, 37-22039, 37-22040 and 37-22041 are the result of transfers for water rights 37-105D, 37-105E, 37-106F, 37-106G, 37-182B, 37-182C, 37-334F, 37-334G, 37-704H, 37-704J, 37-883B, 37-883C, 37-30000K, 37-30000L, 37-300011B, and 37-300011C. The transfers were performed on the SRBA side, so these rights need to be delivered as recommended.	0.040	0.040
37-22041	3/24/1883	0.240		This is a ground water right that is mitigate by diverting water rights 37-22026, 37-22027, 37-22028, 37-22029, 37-22030, 37-22031, 37-22032, 37-22033, 37-22034, 37-22035, 37-22036, 37-22037, 37-22038, 37-22039, 37-22040 and 37-22041 into the Bypass canal or the Dittoe Ditch. Diversion of ground water is limited to those times water is available for diversion under these rights and the ground water will be regulated by the watermaster. When these rights are combined the use of ground water under these rights shall not exceed a total diversion rate of 0.56 cfs and a total annual diversion volume of 98.0 af at the well head and shall not exceed the irrigation of 28 acres.	Water rights 37-22026, 37-22027, 37-22028, 37-22029, 37-22030, 37-22031, 37-22032, 37-22033, 37-22034, 37-22035, 37-22036, 37-22037, 37-22038, 37-22039, 37-22040 and 37-22041 are the result of transfers for water rights 37-105D, 37-105E, 37-106F, 37-106G, 37-182B, 37-182C, 37-334F, 37-334G, 37-704H, 37-704J, 37-883B, 37-883C, 37-30000K, 37-30000L, 37-300011B, and 37-300011C. The transfers were performed on the SRBA side, so these rights need to be delivered as recommended.	0.240	0.240
37-11776	6/30/1884	0.500		This right was recommended to represent 37-334A in the water right database. Water rights 37-2582, 37-11773, 37-11774, 37-11776, 37-11777, 37-11778 and 37-11779 when combined are limited to the irrigation of a 137 acres in a single irrigation season.	this right is the same as 37-334A	0.500	0.500
37-11778	10/1/1890	2.400		This right was recommended to represent 37-714 in the water right database. Water rights 37-2582, 37-11773, 37-11774, 37-11776, 37-11777, 37-11778 and 37-11779 when combined are limited to the irrigation of a 137 acres in a single irrigation season.	This is right is the same as 37-714	2.400	2.400
37-11816	3/24/1883	0.200		This is a portion of water right 37-577, and was recommended per a delivery on the watermaster list for Washington Asphalt. Water rights 37-7210, 37-11816, 37-11817, 37-11818, 37-11819 and 37-11820 are limited to 102 acres of irrigation in a single irrigation season.	This is a portion of water right 37-577. The original diversion rate is unclear, but it appears to have been delivered under the name of Washington Asphalt on past delivery lists.	unknown	0.200
37-12045	3/24/1883	0.190		This is a portion of water right 37-577, and was recommended per a delivery on the watermaster list. Water rights 37-12045 and 37-12049 are limited to 18.9 acres of irrigation in a single irrigation season.	This is a portion of water right 37-577. The original diversion rate is unclear, but it appears to have been delivered under the owners name on past delivery lists.	0.190	0.190
37-12049	6/15/1891	0.500		This was recommended as a portion of water rights 37-704D and 37-704B. Water rights 37-12045 and 37-12049 are limited to 18.9 acres of irrigation in a single irrigation season.	Water rights 37-12049, 37-19827, 37-20707, 37-20708, 37-21982, and 37-704G are splits from water rights 37-704D and 37-704B. When combined the recommendations and the water rights both equal 4.00 cfs	4.000	0.500
37-19827	6/15/1891	0.600		This was recommended as a portion of water rights 37-704D and 37-704B.	Water rights 37-12049, 37-19827, 37-20707, 37-20708, 37-21982, and 37-704G are splits from water rights 37-704D and 37-704B. When combined the recommendations and the water rights both equal 4.00 cfs	see 37-12049 above	0.600
37-20705	3/24/1883	0.180	68	This was recommended as a portion of water rights 37-577CN. When this right is combined with 37-20707 it is limited to 24 acres.	This right appears to be a portion of water right 37-30000Q, which has approximately the same diversion rate. It also shows the match on the previous watermaster delivery lists. This recommendaton was based on a transfer, so it should be delivered as recommended.	0.180	0.180
37-20707	6/15/1891	0.530	214	This was recommended as a portion of water rights 37-704D and 37-704B. When this right is combined with 37-20705 it is limited to 24 acres.	Water rights 37-12049, 37-19827, 37-20707, 37-20708, 37-21982, and 37-704G are splits from water rights 37-704D and 37-704B. When combined the recommendations and the water rights both equal 4.00 cfs	see 37-12049 above	0.530
37-20706	3/24/1883	0.020	5	This was recommended as a portion of water rights 37-577CN. When Combined with water right 37-20708 they are limited to 0.9 cfs and 10.5 af per year.	This right appears to be a portion of water right 37-30000Q, which has approximately the same diversion rate. It also shows the match on the previous watermaster delivery lists. This recommendaton was based on a transfer, so it should be delivered as recommended.	0.020	0.020
37-20708	6/15/1891	0.070	5	This was recommended as a portion of water rights 37-704D and 37-704B. When Combined with water right 37-20706 they are limited to 0.9 cfs and 10.5 af per year.	Water rights 37-12049, 37-19827, 37-20707, 37-20708, 37-21982, and 37-704G are splits from water rights 37-704D and 37-704B. When combined the recommendations and the water rights both equal 4.00 cfs	see 37-12049 above	0.070
37-21981	3/24/1883	0.190		This was recommended as a portion of water right 37-577CC. When this right is combined with 37-21982 it is limited to 19 acres.	I could not find a matching number in the water right database, but this right was included on the watermaster delivery list. Therefore it should be delivered as recommended.	unknown	0.190
37-21982	6/15/1891	0.500		This was recommended as a portion of water rights 37-704D and 37-704B. When this right is combined with 37-21981 it is limited to 19 acres.	Water rights 37-12049, 37-19827, 37-20707, 37-20708, 37-21982, and 37-704G are splits from water rights 37-704D and 37-704B. When combined the recommendations and the water rights both equal 4.00 cfs	see 37-12049 above	0.500
37-577CC	3/24/1883	1.880		This was recommended as a portion of water rights 37-577. When this right is combined with 37-704G it is limited to 106.6 acres.	I could not find a matching number in the water right database, but this right was included on the watermaster delivery list. Therefore it should be delivered as recommended.	unknown	1.880
37-704G	6/15/1891	1.800		This was recommended as a portion of water rights 37-704D and 37-704B. When this right is combined with 37-577CC it is limited to 106.6 acres.	Water rights 37-12049, 37-19827, 37-20707, 37-20708, 37-21982, and 37-704G are splits from water rights 37-704D and 37-704B. When combined the recommendations and the water rights both equal 4.00 cfs	see 37-12049 above	1.800

When Rights 37-468, 37-469, 37-470, 37-893A and 37-2554 are combined they are limited to 160 acres of irrigation. When Rights 37-468, 37-469, 37-470, 37-893A, 37-2554, 37-4114 and 37-2554 are combined they are limited to 277 acres in a single irrigation season.	The recommendatin represents the water right database.	4.500	4.500
37-470	6/21/1890	1.000		This right was recommended as shown in the water right database. This right is limited to the irrigation of 160 acres within the place of use described above in a single irrigation season. When Rights 37-468, 37-469, 37-470, 37-893A and 37-2554 are combined they are limited to 160 acres of irrigation. When Rights 37-468, 37-469, 37-470, 37-893A, 37-2554, 37-4114 and 37-2554 are combined they are limited to 277 acres in a single irrigation season.	The recommendatin represents the water right database.	1.000	1.000
37-893A	9/1/1920	1.690		This right was recommended as shown in the water right database. This right is limited to the irrigation of 160 acres within the place of use described above in a single irrigation season. When Rights 37-468, 37-469, 37-470, 37-893A and 37-2554 are combined they are limited to 160 acres of irrigation. When Rights 37-468, 37-469, 37-470, 37-893A, 37-2554, 37-4114 and 37-2554 are combined they are limited to 277 acres in a single irrigation season. Water under this right is deliverable or may be initiated at the time when the Big Wood River near the Glendale Bridge is dammed and all flow of the river can be conveyed into the Bypass canal heading within the NW1/4SE1/4SW1/4 Section 12, T1N, R18E. The amount of water deliverable under this right is proportionate to the prorata share of senior priority water (prior to 6/15/1883) deliverable in the Baseline Bypass and Extension Bypass system. This right is curtailed when all priority rights through the Baseline Bypass and Extension Bypass system are futile or not called for during the irrigation season. Pursuant to a call in times of scarcity, this right is senior to all other rights that did not result from developed/saved water in the Big Wood River, as established by and subject to the provisions included within In Re Upper Big Wood River Water Users Assn, et. al., plaintiff vs. S. H. Chapman, Watermaster, Defendant in the District Court of Lincoln County dated 8/28/1922.	The recommendatin represents the water right database.	1.690	1.690
37-577BB	3/24/1883	0.480		When rights 37-433E, 37-434E, 37-435E, 37-436F, 37-577BN and 37-577BB are combined they are limited to the irrigation of 97 acres.	This is based on water right 37-577 (Possibly a portion of 37-30021), but it is not possible to match up this right to a specific right in the water right database. It has been delivered under the watermaster list, therefore, deliver the water per recommendation.	not known for sure.	0.480
37-577BN	3/24/1883	1.250		When rights 37-433E, 37-434E, 37-435E, 37-436F, 37-577BN and 37-577BB are combined they are limited to the irrigation of 97 acres.	This is based on water right 37-577, but it is not possible to match up this right to a specific right in the water right database. It has been delivered under the watermaster list, therefore, deliver the water per recommendation.	unknown	1.250
37-590A	5/1/1886	4.000		This right was recommend as listed in water right database. This right allows for 0.20 cfs to remain in the river for mitigation and 3.80 cfs to be delivered to the headgate. Water right 37-115D, 37-590A, and 37-2561 allow for 191 acres of irrigation.	The recommendatin represents the water right database.	4.00 cfs - 0.20 cfs for mitigation = 3.80 cfs	3.800

TOTAL WATER DELIVERED TO THE BASELINE 55C CANAL AT FULL FLOWS IS ==>

109.000

PLEASE NOTE: The water is first diverted into the Bypass canal and then rediverted at the Baseline canal. some of these rights have a conveyence loss amount that allows the diversion at the Bypass to be higher than the diversion at the Baseline to account for ditch losses. The diversion rates on this sheet only reflect the amount of water that can be diverted at the Baseline 55C headgate. ALSO NOTE: There is an issue with delivery of the Bybass Canal, Baseline Canal, and the Bypass Extension canal. These issues concern "Saved Water" rights on the Big Wood River Bypass canal and downstream users. These issues were addressed in a letter on August 6, 2002, from Allen Merrit. This letter gave the watermaster guidance on what was needed to deliver the water rights in

37-62	7/1/1881	2.800		This is the same as water right record.	This is the same as water right record. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	2.800	2.800
37-67B	6/26/1883	3.300		This is the same as water right record.	This is the same as water right record. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	3.300	3.300
37-68A	6/26/1883	1.600		This is the same as water right record.	This is the same as water right record. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	1.600	1.600
37-577AZ	3/24/1883	2.900		This is the same as water right record 37-30020.	This is the same as water right record 37-30020, so use of either number is acceptable. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	2.900	2.900
63-63A	7/31/1881	2.000		This is the same as water right record.	This is the same as water right record. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	2.000	2.000
63-64A	5/1/1883	5.600		Water right 63-64 was split in the SRBA, and additional water was claimed under water right 63-64B. The original diversion rates allocated to 37-64 were represented by claim 37-64A. 37-64B was recommended for disallowal and should not be delivered. Only the portion associated with 37-64A should be delivered.	This right is the same as water right record 37-64, and only the amount allocated by the water right database should be delivered. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	5.600	5.600

BLACK CANAL DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
63-66A	12/19/1882	4.200		Water right 63-66 was split in the SRBA, and additional water was claimed under water right 63-66B. The original diversion rates allocated to 37-66 were represented by claim 37-66A. 37-66B was recommended for disallowal and should not be delivered. Only the portion associated with 37-66A should be delivered.	This right is the same as water right record 37-66, and only the amount allocated by the water right database should be delivered. PLEASE NOTE: Water can also be delivered through the Baseline Bypass Canal. Watermaster will need to monitor both diversion to ensure over diversion does not occur.	4.200	4.200
TOTAL WATER DELIVERED TO THE BLACK CANAL AT FULL FLOWS IS ==>							40.800
<p>PLEASE NOTE: Water right 37-69A is shown as an active right in the water right database that is being diverted in this area. Adjudication claim 37-69A was claimed as possibly being delivered out of this diversion and possibly out of a different diversion, but was disallowed due to no record of delivery. I recommend not delivering water right 37-69A unless there is some showing of a valid SRBA claim on the right. Water rights 37-65 (renumbered to 37-11825), 37-67A (renumbered to 37-11826), and 37-69B (renumbered to 37-11827) appear to have been only been diverted out of a diversion in Section 35, so they were recommended as such. None of these three rights should be delivered at the Black Canal headgate. Ground water rights 37-22050 and 37-2492 supplement the above surface water rights, but these rights are not regulated by the watermaster. Therefore they should not be a concern, but I wanted to make you aware that these rights irrigate some of the same lands.</p>

The splits in the recommendation data base are different than the water right database, but the total cfs is the same. Recommendations 37-20896 and 37-20898 when combined are limited to 20.9 acres. Recommendation 37-20896 is a ground water right not subject to watermaster control.	Recommendations 37-102B, 37-20897, 37-20898, 37-21834, 37-21947 & 37-21948 when combined are the same as the total of water rights 37-102A and 37-102B. Therefore, you can deliver these rights as decreed.	See 37-102B above	1.240
37-21834	6-1-1887	1.360		This recommendation is a portion of water rights 37-102A and 37-102B. The splits in the recommendation data base are different than the water right database, but the total cfs is the same. Recommendations 37-21834 and 37-7064D when combined are limited to 18 acres. Recommendation 37-7064D is a ground water right not subject to watermaster control.	Recommendations 37-102B, 37-20897, 37-20898, 37-21834, 37-21947 & 37-21948 when combined are the same as the total of water rights 37-102A and 37-102B. Therefore, you can deliver these rights as decreed.	See 37-102B above	1.360
37-21947	6-1-1887	1.380		This recommendation is a portion of water rights 37-102A and 37-102B. The splits in the recommendation data base are different than the water right database, but the total cfs is the same. Recommendations 37-21947 and 37-21603 when combined are limited to 24.2 acres. Recommendation 37-21603 is a ground water right not subject to watermaster control.	Recommendations 37-102B, 37-20897, 37-20898, 37-21834, 37-21947 & 37-21948 when combined are the same as the total of water rights 37-102A and 37-102B. Therefore, you can deliver these rights as decreed.	See 37-102B above	1.380
37-21948	6-1-1887	1.120		This recommendation is a portion of water rights 37-102A and 37-102B. The splits in the recommendation data base are different than the water right database, but the total cfs is the same. Recommendations 37-21948 and 37-21604 when combined are limited to 20.1 acres. Recommendation 37-21604 is a ground water right not subject to watermaster control.	Recommendations 37-102B, 37-20897, 37-20898, 37-21834, 37-21947 & 37-21948 when combined are the same as the total of water rights 37-102A and 37-102B. Therefore, you can deliver these rights as decreed.	See 37-102B above	1.120
37-480A	6/15/1891	0.400		This recommendation states it is portion of water right 37-480. Recommendations 37-113N and 37-480A when combined should not irrigate more than 15 acres.	Several adjudication claims were filed using the 6/15/1891 priority dates. The court allowed under the Frost vs Alturas Water Company decree 5 water rights with this date. These rights are 37-350, 37-480, 37-667, 37-703 and 37-704. When totaled these 5 decrees allow a total of 68 cfs. Several claims were filed against these rights without referencing a specific water right decree number. Therefore, it is impossible to discern which specific water right goes to which claim, however, the total amount claimed in the SRBA is 0.73 cfs less than the original decreed amount. I am assuming this 0.73 cfs has been abandoned or forfeited. Due to the numerous splits and transfers on these rights, they should be delivered as recommended in order to prevent confusion.	originally 37-480 was for 20 cfs	0.400

Recommendations 37-2557X and 37-8663 are a ground water rights not regulated by the watermaster.	Several adjudication claims were filed using the 6/15/1891 priority dates. The court allowed under the Frost vs Alturas Water Company decree 5 water rights with this date. These rights are 37-350, 37-480, 37-667, 37-703 and 37-704. When totaled these 5 decrees allow a total of 68 cfs. Several claims were filed against these rights without referencing a specific water right decree number. Therefore, it is impossible to decern which specific water right goes to which claim, however, the total amount claimed in the SRBA is 0.73 cfs less than the original decreed amount. I am assuming this 0.73 cfs has been abandoned or forfeited. Due to the numerous splits and transfers on these rights, they should be delivered as recommended in order to prevent confusion.	originally 37-480 was for 20 cfs, 37-667 was for 36 cfs and 37-350 was for 2 cfs.	0.123
37-20793	6/15/1891	0.152		This recommendation states it is portion of water right 37-480 and 37-667, but it is also appears to include 37-350. Recommendations 37-2557K, 37-20765, 37-20772, 37-20779, 37-20786, and 37-20793, when combined should not irrigate more than 5 acres. Recommendations 37-2557K is a ground water right not regulated by the watermaster.	Several adjudication claims were filed using the 6/15/1891 priority dates. The court allowed under the Frost vs Alturas Water Company decree 5 water rights with this date. These rights are 37-350, 37-480, 37-667, 37-703 and 37-704. Due to the numerous splits and transfers on these rights, they should be delivered as recommended in order to prevent confusion.	originally 37-480 was for 20 cfs, 37-667 was for 36 cfs and 37-350 was for 2 cfs.	0.130
37-21712	6/15/1891	0.130		This recommendation states it is portion of water right 37-480 and 37-667, but it is also appears to include 37-350. Recommendations 37-21676, 37-21685, 37-21694, 37-21703, and 37-21712 when combined should not irrigate more than 5 acres.	Several adjudication claims were filed using the 6/15/1891 priority dates. The court allowed under the Frost vs Alturas Water Company decree 5 water rights with this date. These rights are 37-350, 37-480, 37-667, 37-703 and 37-704. When totaled these 5 decrees allow a total of 68 cfs. Several claims were filed against these rights without referencing a specific water right decree number. Therefore, it is impossible to decern which specific water right goes to which claim, however, the total amount claimed in the SRBA is 0.73 cfs less than the original decreed amount. I am assuming this 0.73 cfs has been abandoned or forfeited. Due to the numerous splits and transfers on these rights, they should be delivered as recommended in order to prevent confusion.	originally 37-480 was for 20 cfs, 37-667 was for 36 cfs and 37-350 was for 2 cfs.	0.130

37-10828	6/15/1891	0.780		This recommendation states it is a portion of water right 37-667. Recommendations 37-418A, 37-419A, 37-666A, and 37-10828 when combined are limited to 79 acres	Several adjudication claims were filed using the 6/15/1891 priority dates. The court allowed under the Frost vs Alturas Water Company decree 5 water rights with this date. These rights are 37-350, 37-480, 37-667, 37-703 and 37-704. When totaled these 5 decrees allow a total of 68 cfs. Several claims were filed against these rights without referencing a specific water right decree number. Therefore, it is impossible to discern which specific water right goes to which claim, however, the total amount claimed in the SRBA is 0.73 cfs less than the original decreed amount. I am assuming this 0.73 cfs has been abandoned or forfeited. Due to the numerous splits and transfers on these rights, they should be delivered as recommended in order to prevent confusion.	Originally 37-667 was for 36 cfs.	0.780
37-667C	6/15/1891	3.200		This recommendation states it is a portion of water right 37-667. Recommendations 37-115B, 37-667C, 37-881, and 37-4433 when combined are limited to 143 acres. 37-4433 is a ground water right that is not under the watermaster's control.	Several adjudication claims were filed using the 6/15/1891 priority dates. The court allowed under the Frost vs Alturas Water Company decree 5 water rights with this date. These rights are 37-350, 37-480, 37-667, 37-703 and 37-704. When totaled these 5 decrees allow a total of 68 cfs. Several claims were filed against these rights without referencing a specific water right decree number. Recommendation 37-21807 is a ground water right not regulated by the watermaster.	The recommendation is the same as the water right record.	0.440	0.440
37-477	6/2/1890	0.860		This right was recommended as a portion of the Riley right. It has been delivered by the watermaster in the past, so deliver as recommended. Recommendations 37-475, 37-234B, 37-116, 37-111, 37-21805, 37-112, 37-886J, 37-477, 37-577V, 37-418E, and 21807 when combined are limited to 154 acres. Recommendation 37-21807 is a ground water right not regulated by the watermaster.	The recommendation is the same as the water right record.	0.860	0.860
37-234B	6/15/1884	2.000		Recommended was recommended as a combination of 37-234A and 37-234B in the water right database. Recommendations 37-475, 37-234B, 37-116, 37-111, 37-21805, 37-112, 37-886J, 37-477, 37-577V, 37-418E, and 21807 when combined are limited to 154 acres. Recommendation 37-21807 is a ground water right not regulated by the watermaster.	Recommendation reflects the combined diversion rate of 37-234A and 37-234B	2.000	2.000
37-577V	3/24/1883	2.800		This is a portion of the Riley right, but there is no way to link this right to the water right database. Recommendations 37-475, 37-234B, 37-116, 37-111, 37-21805, 37-112, 37-886J, 37-477, 37-577V, 37-418E, and 21807 when combined are limited to 154 acres. Recommendation 37-21807 is a ground water right not regulated by the watermaster.	This is a portion of the Riley right. There is no way to trace it to the water right database, but it has been delivered per the watermaster delivery lists. Deliver as recommended.	unknown	2.800
37-418E	6/23/1888	0.040		Recommended the same as 37-418D in the water right database. Recommendations 37-475, 37-234B, 37-116, 37-111, 37-21805, 37-112, 37-886J, 37-477, 37-577V, 37-418E, and 21807 when combined are limited to 154 acres. Recommendation 37-21807 is a ground water right not regulated by the watermaster.	Recommended the same as 37-418D	0.04	0.040
37-886J	6/1/1884	0.200		Recommended the same as 37-886G in the water right database. Recommendations 37-475, 37-234B, 37-116, 37-111, 37-21805, 37-112, 37-886J, 37-477, 37-577V, 37-418E, and 21807 when combined are limited to 154 acres. Recommendation 37-21807 is a ground water right not regulated by the watermaster.	Recommended the same as 37-886G	0.200	0.200

DISTRICT 45 CANAL DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-418A	6/23/1888	0.430		It appears as though water rights 37-418A and 37-418C were recombined and then resplit in the SRBA. This recommendation represent a portion of water rights 37-418A and 37-418C. Recommendations 37-418A, 37-419A and 37-666A when combined are limited to 79 acres of irrigation.	Water rights 37-418A and 37-418C allowed a total of 3.90 cfs. These rights only have 3.06 cfs recommended under recommendations 37-418A, 37-418C, and 37-418D. Recommendation 37-10723 claimed it was associated with these base rights, but it was recommended for disallow in the SRBA due to lack of beneficial use. Therefore, it appears as though the difference between the recommendations and the water rights are due to forfeiture or abandonment. We suggest that only the recommendations be delivered under this water right.	37-418A = 3.40 cfs + 37-418C = 0.50 cfs = a total of 3.90 cfs	0.430
37-418C	6/23/1888	0.880		It appears as though water rights 37-418A and 37-418C were recombined and then resplit in the SRBA. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control. Recommendations 37-418C, 37-419C, and 37-2656 when combined are limited to 159 acres. 37-2656 is a ground water right that is not under watermaster control.	Water rights 37-418A and 37-418C allowed a total of 3.90 cfs. These rights only have 3.06 cfs recommended under recommendations 37-418A, 37-418C, and 37-418D. Recommendation 37-10723 claimed it was associated with these base rights, but it was recommended for disallow in the SRBA due to lack of beneficial use. Therefore, it appears as though the difference between the recommendations and the water rights are due to forfeiture or abandonment. We suggest that only the recommendations be delivered under this water right.	37-418A = 3.40 cfs + 37-418C = 0.50 cfs = a total of 3.90 cfs	0.880
37-418D	6/23/1888	1.750		It appears as though water rights 37-418A and 37-418C were recombined and then resplit in the SRBA. This recommendation represent a portion of water rights 37-418A and 37-418C. Recommendations 37-353D, 37-418D, 37-419D, 37-443, 37-480B, 37-637, 37-665H, 37-666F, 37-667K, 37-713B, 37-802, 37-2345A and 37-2684 when combined are limited to 1528 acres. 37-2345A & 37-2684 are ground water rights that are not under the watermaster's control. 37-637 and 37-443 are Loving Creek rights.	Water rights 37-418A and 37-418C allowed a total of 3.90 cfs. These rights only have 3.06 cfs recommended under recommendations 37-418A, 37-418C, and 37-418D. Recommendation 37-10723 claimed it was associated with these base rights, but it was recommended for disallow in the SRBA due to lack of beneficial use. Therefore, it appears as though the difference between the recommendations and the water rights are due to forfeiture or abandonment. We suggest that only the recommendations be delivered under this water right.	37-418A = 3.40 cfs + 37-418C = 0.50 cfs = a total of 3.90 cfs	1.750
37-886D	6/1/1884	0.120		This recommendation is similar to 37-886D in the water right database. This right is limited to 3 acres of irrigation. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	Water right 37-886D was for 0.128 cfs, but it also required 6% for channel losses to remain in the river. The recommendation removed the 0.008 cfs from this right to adjust for those channel losses. Therefore, this right should be delivered as recommended to the headgate.	0.12 cfs X 0.94 = 0.12 cfs to be delivered at the headgate.	0.120
37-886H	6/1/1884	0.200		This recommendation is based on water right 37-886, but it is not definite what portion of the right this recommendation is associated with. However, it is still below the amount of the original base right, so it should be alright. This right allows 0.20 cfs with 0.02 cfs for channel losses. According to the right, the owner can divert 0.20 cfs into the canal, but only 0.18 cfs can be diverted at the owner's headgate from the canal.	The base right was split, and approximately 0.20 cfs was not accounted for in the water right database. This recommendation was filed to account for that missing 0.20 cfs in the water right database. Water right 37-886 was originally for 2.00 cfs, after several splits and transfers only 1.82 cfs was shown in the water right database. Therefore, this right should be delivered per the recommendation.	2.000	0.200
37-886L	6/1/1884	0.600		This recommendation is based on 37-886F in the water right database. Both rights are similar. 0.06 of this right is for mitigation and channel losses in the river. Only 0.54 cfs can be diverted at the District 45 canal.	This recommendation is similar to 37-886F. Water right 37-886F has a condition that states that the diversion to the headgate should not exceed 0.56 cfs due to 10% conveyance losses. However, 10% conveyance losses would limit the right to 0.54 cfs. The recommendation corrected the water right condition, so this right should be delivered per the recommendation.	0.60 cfs X 0.90 = 0.54 cfs per the 10% conveyance losses.	0.540

DISTRICT 45 CANAL DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-113K	7/10/1884	4.000		This right appears to 1/2 of water right 37-113A, but it is unclear from the records. 0.08 cfs of this right is to mitigate river losses, so only 3.92 cfs is to be diverted into the District 45 canal. Recommendations 37-113K, 37-482D, and 37-705 when combined are limited to the irrigation of 141 acres.	This recommendation is a split of water right 37-113. There have been several splits of this water right in the SRBA database, but when these recommendations are totalled, they have lower combined rate of diversion than the water right database. It does appear as though recommendations 37-113K and 37-113P are direct splits from 37-113A in the water right database. Therefore, It should be delivered per the recommendation in order to avoid confusion.	8.000	4.000
37-113N	7/10/1884	0.400		This right appears to be a portion of water right 37-113B, but it is unclear from the records. Recommendations 37-113N, 37-480A when combined are limited to 15 acres of irrigation.	This recommendation is a split of water right 37-113. There have been several splits of this water right in the SRBA database, but when these recommendations are totalled, they have lower combined rate of diversion than the water right database. It appears as though this recommendation is a split from 37-113B in the water right database. Therefore, It should be delivered per the recommendation in order to avoid confusion.	3.000	0.400
37-113P	7/10/1884	0.120		This right appears to be a portion of water right 37-113f, but it is unclear from the records.	This recommendation is a split of water right 37-113. There have been several splits of this water right in the SRBA database, but when these recommendations are totalled, they have lower combined rate of diversion than the water right database. It appears as though this recommendation is a split from 37-113F in the water right database. Therefore, It should be delivered per the recommendation in order to avoid confusion.	0.240	0.120
37-113T	7/10/1884	4.000		This right appears to 1/2 of water right 37-113A, but it is unclear from the records. Recommendations 37-113T and 37-480F when combined are limited to the irrigation of 95 acres.	This recommendation is a split of water right 37-113. There have been several splits of this water right in the SRBA database, but when these recommendations are totalled, they have lower combined rate of diversion than the water right database. It does appear as though recommendations 37-113K and 37-113P are direct splits from 37-113A in the water right database. Therefore, It should be delivered per the recommendation in order to avoid confusion.	See 37-113K above	4.000
37-20642	7/10/1884	0.040		This recommendation is split through a transfer from water right 37-113C. Recommendations 37-20638, 37-20640, 37-20642, and 37-20644 when combined are limited to the 7.3 acre-feet at the field headgate. These rights are associated with storage ponds under water right permits 37-20653 and 37-20654. Recommendations 37-20640 and 37-20638 are ground water rights not regulated by the watermaster.	This recommendation is a split of water right 37-113C through the transfer process. Therefore, it should be delivered per the recommendation.	0.040	0.040
37-20641	7/10/1884	0.960		This recommendation is split through a transfer from water right 37-113C. This recommendation is limited to 33.3 acres of irrigation. Recommendations 37-20635, 37-20639, 37-20641, 37-20643, 37-20645, 37-20647, 37-20649, and 37-20651 when combined are limited to the 885 acre-feet at the field headgate. These rights are associated with storage ponds under water right permits 37-20653 and 37-20654. Recommendations 37-20635 and 37-20639 are ground water rights not regulated by the watermaster. Water rights 37-20645, 37-20647, 37-20649, and 37-20651 are delivered through the Baseline Canal.	This recommendation is a split of water right 37-113C through the transfer process. Therefore, it should be delivered per the recommendation.	0.960	0.960

37-21877	7/10/1884	0.012		This recommendation is a portion of water right 37-664. There are approximately 51 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-2557M, 37-21860, 37-21877, 37-21894, 37-21911, 37-21928, and 37-21977 when combined should not irrigate more than 5.4 acres. Recommendations 37-2557M and 37-21977 is a ground water right not regulated by the watermaster.	This recommendation is a split of decreed water right 37-664. The SRBA recommendation as less than the original decree, but due to the numerous splits, the recommendation should be delivered to avoid confusion	See 37-664B above	0.012
37-21878	7/10/1884	0.005		This recommendation is a portion of water right 37-664. There are approximately 51 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21844, 37-21861 37-21878, 37-21895, 37-21912, and 37-21929 when combined should not irrigate more than 5.4 acres. Recommendations 37-21844 is a ground water right not regulated by the watermaster.	This recommendation is a split of decreed water right 37-664. The SRBA recommendation as less than the original decree, but due to the numerous splits, the recommendation should be delivered to avoid confusion	See 37-664B above	0.005
37-21879	7/10/1884	0.008		This recommendation is a portion of water right 37-664. There are approximately 51 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21845, 37-21862, 37-21879, 37-21896, 37-21913, and 37-21930 when combined should not irrigate more than 8.2 acres. Recommendations 37-21845 is a ground water right not regulated by the watermaster.	This recommendation is a split of decreed water right 37-664. The SRBA recommendation as less than the original decree, but due to the numerous splits, the recommendation should be delivered to avoid confusion	See 37-664B above	0.008
37-21880	7/10/1884	0.002		This recommendation is a portion of water right 37-664. There are approximately 51 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount.	This recommendation is a split of decreed water right 37-664. The SRBA recommendation as less than the original decree, but due to the numerous splits, the recommendation should be delivered to avoid confusion	See 37-664B above	0.002
37-114C	5/1/1886	12.52 cfs		This recommendation represents water right 37-114B. This recommendations allows 12.52 cfs to be diverted into the canal, but only 3.39 cfs can be diverted to the farm at the headgate from the canal.	This recommendation is based on water right 37-114B. Water right 37-114B was involved in a transfer that addressed the large diversion rate for the acres being irrigated. It was determined in the transfer that 12.52 cfs could be diverted into the canal for channel loss, but that only 3.39 cfs could be diverted from the canal to the owners property.	12.52 cfs at the canal 3.39 cfs at the field headgate	12.520
37-114F	5/1/1886	0.008		This recommendation represents a portion of water right 37-114A. Recommendations 37-114F, 37-664G, 37-665R, 37-666P, 37-667T, 37-11526B, 37-2559B, and 37-20737 when combined are limited to 20 acres. 37-2559B & 37-20737 are ground water rights that are not under the watermaster's control.	This recommendation represents a portion of 37-114A. When all of the recommendations split from this original water right are added together they supply less water than the original water right, therefore, it should be delivered according to the recommendation to avoid confusion.	2.48 cfs	0.008
37-20989	5/1/1886	2.120		This recommendation represents a portion of water right 37-114A. This recommendation is limited to 511 acres of irrigation. Recommendations 37-20951, 37-20970, 37-20989, 37-21008, 37-21027, 37-21065, 37-21046, and 37-21084 when combined are limited to 511 acres. 37-21046 & 37-21084 are ground water rihgt that are not under the watermaster's control.	This recommendation represents a portion of 37-114A. When all of the recommendations split from this original water right are added together they supply less water than the original water right, therefore, it should be delivered according to the recommendation to avoid confusion.	See 37-114F above.	2.120
37-20993	5/1/1886	0.120		This recommendation represents a portion of water right 37-114A. This right is limited to 28.7 acres of irrigation during the irrigation season. Recommendations 37-20955, 37-20974, 37-20993, 37-21012, 37-21031, 37-21050, and 37-21088 when combined are limited to 28.7 acres. 37-21050 & 37-21088 are ground water rihgt that are not under the watermaster's control.	This recommendation represents a portion of 37-114A. When all of the recommendations split from this original water right are added together they supply less water than the original water right, therefore, it should be delivered according to the recommendation to avoid confusion.	See 37-114F above.	0.120
37-21369	5/1/1886	0.080		This recommendation represents a portion of water right 37-114A. Recommendations 37-21369, 37-21371, 37-21373, 37-21375, 37-21377, and 37-21379 when combined are limited to 20 acres.	This recommendation represents a portion of 37-114A. When all of the recommendations split from this original water right are added together they supply less water than the original water right, therefore, it should be delivered according to the recommendation to avoid confusion. 37-11566	3/24/1883	0.550		This recommendation is based on the Riley right. It has been delivered by the watermaster, therefore, it was recommended. Recommendations 37-2732, 37-11566, 37-11567, 37-11568, and 37-11569 when combined are limited to 90.2 acres. 37-2732 is a ground water right that is not under the watermaster's control.	This is a portion of the Riley right. There is no way to trace it to the water right database, but it has been delivered per the watermaster delivery lists. Deliver as recommended.	0.550	0.550
37-666A	6/12/1886	0.390		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-418A, 37-419A, 37-666A, and 37-10828 when combined are limited to 79 acres	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	18.000	0.390
37-666D	6/12/1886	1.780		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-666D, 37-20443, 37-20883 and 37-20885 when combined are limited to 138.7 acres. 37-20443 is a ground water right that is not under the watermaster's control.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	1.780
37-666F	6/12/1886	3.428		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-353D, 37-418D, 37-419D, 37-443, 37-480B, 37-637, 37-665H, 37-666F, 37-667K, 37-713B, 37-802, 37-2345A and 37-2684 when combined are limited to 1528 acres. 37-2345A & 37-2684 are ground water rights that are not under the watermaster's control. 37-637 and 37-443 are Loving Creek rights.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	3.428
37-666G	6/12/1886	3.200		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	3.200
37-666H	6/12/1886	0.790		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control. Recommendations 37-666H and 37-667M when combined are limited to 560 acres.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.790

37-21548	6/12/1886	0.005		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21511, 37-21515, 37-21526, 37-21537, 37-21548, and 37-21559 when combined should not irrigate more than 5 acres. Recommendations 37-21511 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.005
37-21549	6/12/1886	0.005		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21504, 37-21516, 37-21527, 37-21538, 37-21549, and 37-21560 when combined should not irrigate more than 5 acres. Recommendations 37-21504 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.005
37-21550	6/12/1886	0.005		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21505, 37-21517, 37-21528, 37-21539, 37-21550, and 37-21561 when combined should not irrigate more than 5 acres. Recommendations 37-21505 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.005

The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.012
37-21912	6/12/1886	0.005		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21844, 37-21861 37-21878, 37-21895, 37-21912, and 37-21929 when combined should not irrigate more than 5.4 acres. Recommendations 37-21844 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.005
37-21913	6/12/1886	0.008		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21845, 37-21862, 37-21879, 37-21896, 37-21913, and 37-21930 when combined should not irrigate more than 8.2 acres. Recommendations 37-21845 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.008
37-21914	6/12/1886	0.002		This recommendation is a portion of water right 37-666. There are approximately 58 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount.	The original decree for this water right was for 18 cfs, which was later split into 37-666A and 37-666B. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-666A above.	0.002
37-115B	6/12/1886	3.200		This recommendation is based on 37-115B in the water right database. Recommendations 37-115B, 37-667C, 37-881, and 37-4433 when combined are limited to 143 acres. 37-4433 is a ground water right that is not under the watermaster's control.	This recommendation is the same as water right 37-115B	3.200	3.200
37-115F	6/12/1886	1.000		This recommendation is based on 37-115F in the water right database. Recommendations 37-597B, 37-590B, 37-501C, 37-501B, 37-115F, and 37-2502 are limited to 268 acres of irrigation. Recommendation 37-2502 is ground water right not regulated by the watermaster.	This recommendation is the same as water right 37-115F	1.000	1.000
37-115G	6/12/1886	8.800		This recommendation is based on a combination of water rights 37-115G and 37-115H in the water right database. This right is limited to the irrigation of 480 acres. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	This recommendation is the same as the combined rates of water rights 37-115G and 37-115H.	8.800	8.800

Recommendations 37-2557K is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.060
37-20875	9/18/1885	0.060		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-20868, 37-20871, 37-20873, 37-20875, 37-20877, and 37-20879 when combined should not irrigate more than 5 acres. Recommendations 37-20868 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.060
37-21535	9/18/1885	0.100		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-2557V, 37-21513, 37-21524, 37-21535, 37-21546, and 37-21557 when combined should not irrigate more than 10.5 acres. Recommendations 37-2557V is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.100
37-21536	9/18/1885	0.100		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-2557H, 37-21514, 37-21525, 37-21536, 37-21547, and 37-21558 when combined should not irrigate more than 9.9 acres. Recommendations 37-2557H is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.100
37-21537	9/18/1885	0.050		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21511, 37-21515, 37-21526, 37-21537, 37-21548, and 37-21559 when combined should not irrigate more than 5 acres. Recommendations 37-21511 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.050
37-21538	9/18/1885	0.050		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21504, 37-21516, 37-21527, 37-21538, 37-21549, and 37-21560 when combined should not irrigate more than 5 acres. Recommendations 37-21504 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.050

37-21892	9/18/1885	0.050		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-2557R, 37-21858, 37-21875, 37-21892, 37-21909, and 37-21926 when combined should not irrigate more than 5 acres. Recommendations 37-2557R is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.050
37-21893	9/18/1885	0.050		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-25578, 37-21859, 37-21876, 37-21893, 37-21910, and 37-21927 when combined should not irrigate more than 5 acres. Recommendations 37-2557B is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.050
37-21894	9/18/1885	0.120		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-2557M, 37-21860, 37-21877, 37-21894, 37-21911, 37-21928, and 37-21977 when combined should not irrigate more than 5.4 acres. Recommendations 37-2557M and 37-21977 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.120
37-21895	9/18/1885	0.050		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21844, 37-21861 37-21878, 37-21895, 37-21912, and 37-21929 when combined should not irrigate more than 5.4 acres. Recommendations 37-21844 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.050
37-21896	9/18/1885	0.080		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount. Recommendations 37-21845, 37-21862, 37-21879, 37-21896, 37-21913, and 37-21930 when combined should not irrigate more than 8.2 acres. Recommendations 37-21845 is a ground water right not regulated by the watermaster.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.080
37-21897	9/18/1885	0.012		This recommendation is a portion of water right 37-298. There are approximately 48 splits of this right in the SRBA, but the total of the splits is still below the original decreed amount.	The original decree for this water right was for 4 cfs, which was later split into 37-298A and 37-298. The SRBA recommendations don't follow the water right database, but the total recommendations are less than the original decreed. Therefore, deliver the water per the recommendation to avoid confusion.	See 37-11926B above	0.012
37-12191	6/12/1886	0.030		This right has been decreed.	Partial decree issued, Stockwater rights	0.030	0.030
37-158D	7/1/1881	1.000		This recommendation relects water right 37-158D in the water right database. The comments for this right require that only 0.94 cfs can be diverted at the canal headgate per a previous transfer. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	This right reflects 37-158D in the water right database. Only 0.94 cfs can be diverted at the canal headgate.	1.00 cfs - .06 cfs for channel loss = 0.94 cfs	0.940

37-21065	3/24/1883	0.940		This is a portion of the Riley right, but there is no way to link this right to the water right database. This right is limited to 511 acres of irrigation during the irrigation season. Recommendations 37-20951, 37-20970, 37-20989, 37-21008, 37-21027, 37-21065, 37-21046, and 37-21084 when combined are limited to 511 acres. 37-21046 & 37-21084 are ground water rightst that are not under the watermaster's control.	This is a portion of the Riley right. There is no way to trace it to the water right database. Deliver as recommended.	unknown	0.940
37-21069	3/24/1883	0.050		This is a portion of the Riley right, but there is no way to link this right to the water right database. This right is limited to 28.7 acres of irrigation during the irrigation season.	This is a portion of the Riley right. There is no way to trace it to the water right database. Deliver as recommended.	unknown	0.050
37-481B	8/1/1882	13.670		This recommendation is a portion of water right 37-481. There are seven splits of this right, but when added they are very close to the total of the original decree for water right 37-481. Recommendations 37-665K, 37-666J, and 37-667N are limited to 263 acres. Recommendations 37-481B, 37-482G, 37-483B, 37-665K, 37-666J, 37-667N, 37-2625A, 37-2638, 37-2700, 37-21463, and 37-22155 are limited to 1435.1 acres. Recommendations 37-481B, 37-482G, 37-483B, 37-665K, 37-666J, 37-667N, and 37-22155 are limited to 1425.1 acres. Water rights 37-2625A, 37-2638, 37-2700, and 37-21463 are ground water rights not under watermaster control.	When all of the recommendations that were split from 37-481 are totalled, they are very close to the original decree. Therefore, in order to avoid confusion, deliver per the recommendations.	20.000	13.670
37-481C	8/1/1882	3.014		This recommendation is a portion of water right 37-481. There are seven splits of this right, but when added they are very close to the total of the original decree for water right 37-481. Recommendations 37-481C, 37-482H, 37-483C, 37-577BT, and 37-2630 when combined are limited to the irrigation of 289 acres. Recommendation 37-2630 is a ground water right not under the control of the watermaster.	When all of the recommendations that were split from 37-481 are totalled, they are very close to the original decree. Therefore, in order to avoid confusion, deliver per the recommendations. This recommendation is slightly over its porportionate share due to rounding. Only deliver 3.01 cfs.	See 37-481B above.	3.010
37-21341	8/1/1882	0.090		This recommendation is a portion of water right 37-481. There are seven splits of this right, but when added they are very close to the total of the original decree for water right 37-481. Recommendations 37-21341, 37-21343, 37-21345, and 37-21347 when combined are limited to 5 acres.	When all of the recommendations that were split from 37-481 are totalled, they are very close to the original decree. Therefore, in order to avoid confusion, deliver per the recommendations.	See 37-481B above.	0.090
37-21581	8/1/1882	0.100		This recommendation is a portion of water right 37-481. There are seven splits of this right, but when added they are very close to the total of the original decree for water right 37-481. Recommendations 37-21581, 37-21584, 37-21587, and 37-21590 when combined are limited to 4.5 acres.	When all of the recommendations that were split from 37-481 are totalled, they are very close to the original decree. Therefore, in order to avoid confusion, deliver per the recommendations.	See 37-481B above.	0.100
37-21582	8/1/1882	0.100		This recommendation is a portion of water right 37-481. 37-21583	8/1/1882	0.030		This recommendation is a portion of water right 37-481. There are seven splits of this right, but when added they are very close to the total of the original decree for water right 37-481. Recommendations 37-21583, 37-21586, 37-21589, and 37-21592 when combined are limited to 4 acres.	When all of the recommendations that were split from 37-481 are totalled, they are very close to the original decree. Therefore, in order to avoid confusion, deliver per the recommendations.	See 37-481B above.	0.030
37-483B	8/1/1902	68.000		This recommendation is based on water right 37-483 in the water right database. There are seven splits on this right and when combined the total is less than the original decreed amount. Recommendations 37-481B, 37-482G, and 37-483B when combined are limited to the irrigation of 1079 acres. Recommendations 37-665K, 37-666J, and 37-667N are limited to 263 acres. Recommendations 37-481B, 37-482G, 37-483B, 37-665K, 37-666J, 37-667N, 37-2625A, 37-2638, 37-2700, 37-21463, and 37-22155 are limited to 1435.1 acres. Recommendations 37-481B, 37-482G, 37-483B, 37-665K, 37-666J, 37-667N, and 37-22155 are limited to 1425.1 acres. Water rights 37-2625A, 37-2638, 37-2700, and 37-21463 are ground water rights not under watermaster control.	This recommendation is based on water right 37-483. 37-483 was decreed for 100 cfs, but was involved in a transfer that determined that 3 cfs of that amount had been forfeited. Therefore, the remaining amount in the water right database was 97 cfs. The SRBA recommendations come to a total of 87.676 cfs. The discrepancy between the water right and SRBA records is that recommendation 37-11951 filed on this right was determined to be abandoned or forfeited due to no beneficial use. 37-11951 accounted for the difference between the two records. Whereas the review of 37-11951 determined that a portion of this right has been abandoned, it would be best to deliver these rights per the recommendations to avoid confusion.	97.000	68.000
37-483C	8/1/1902	15.086		This recommendation is based on water right 37-483 in the water right database. There are seven splits on this right and when combined the total is less than the original decreed amount. Recommendations 37-481C, 37-482H, 37-483C, 37-577BT, and 37-2630 when combined are limited to the irrigation of 289 acres. Recommendation 37-2630 is a ground water right not under the control of the watermaster.	This recommendation is based on water right 37-483. 37-483 was decreed for 100 cfs, but was involved in a transfer that determined that 3 cfs of that amount had been forfeited. Therefore, the remaining amount in the water right database was 97 cfs. The SRBA recommendations come to a total of 87.676 cfs. This recommendation is based on water right 37-483. 37-483 was decreed for 100 cfs, but was involved in a transfer that determined that 3 cfs of that amount had been forfeited. Therefore, the remaining amount in the water right database was 97 cfs. The SRBA recommendations come to a total of 87.676 cfs. The discrepancy between the water right and SRBA records is that recommendation 37-11951 filed on this right was determined to be abandoned or forfeited due to no beneficial use. 37-11951 accounted for the difference between the two records. Whereas the review of 37-11951 determined that a portion of this right has been abandoned, it would be best to deliver these rights per the recommendations to avoid confusion.	See 37-483 above	0.190
37-21347	3/24/1883	0.060		This is a portion of the Riley right, but there is no way to link this right to the water right database. Recommendations 37-21341, 37-21343, 37-21345, and 37-21347 when combined are limited to 5 acres.	This is a portion of the Riley right. There is no way to trace it to the water right database. Deliver as recommended.	unknown	0.060
37-21590	3/24/1883	0.060		This is a portion of the Riley right, but there is no way to link this right to the water right database. Recommendations 37-21581, 37-21584, 37-21587, and 37-21590 when combined are limited to 4.5 acres.	This is a portion of the Riley right. There is no way to trace it to the water right database. Deliver as recommended.	unknown	0.060
37-21591	3/24/1883	0.060		This is a portion of the Riley right, but there is no way to link this right to the water right database. Recommendations 37-21582, 37-21585, 37-21588, and 37-21591 when combined are limited to 5 acres.	This is a portion of the Riley right. There is no way to trace it to the water right database. Deliver as recommended.	unknown	0.060
37-21592	3/24/1883	0.040		This is a portion of the Riley right, but there is no way to link this right to the water right database. Recommendations 37-21583, 37-21586, 37-21589, and 37-21592 when combined are limited to 4 acres.	This is a portion of the Riley right. There is no way to trace it to the water right database. Deliver as recommended.	unknown	0.040

Therefore, deliver per recommendations to avoid confusion.	See 37-21805 above	0.740
37-22155	4/1/1922	1.860		This recommendation is based on a beneficial use claim. Recommendations 37-665K, 37-666J, and 37-667N are limited to 263 acres. Recommendations 37-481B, 37-482G, 37-483B, 37-665K, 37-666J, 37-667N, 37-2625A, 37-2638, 37-2700, 37-21463, and 37-22155 are limited to 1435.1 acres. Recommendations 37-481B, 37-482G, 37-483B, 37-665K, 37-666J, 37-667N, and 37-22155 are limited to 1425.1 acres. Water rights 37-2625A, 37-2638, 37-2700, and 37-21463 are ground water rights not under watermaster control.	This is a beneficial use recommendation. It is only to be delivered after all existing decreed rights have been delivered until the partial decree is issued.	N/A	1.860

DISTRICT 45 CANAL DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-2345A 37-235B	2/12/1917 6/15/1883	4.800 1.000		This recommendation is a portion of license 37-2345. The remainder of this license was not claimed in SRBA and considered forfeited or abandoned. Recommendations 37-353D, 37-418D, 37-419D, 37-443, 37-480B, 37-637, 37-665H, 37-666H, 37-667K, 37-713B, 37-802, 37-2345A, 37-2684 and 37-11671 when combined should not irrigate more than 1528 acres. Recommendations 37-802 and 37-2684 are ground water rights not regulated by the watermaster. This recommendation reflects water right 37-235B.	Water right 37-2345 is for 12.52 cfs, but only the portion recommended was claimed in the SRBA. Therefore, the remainder is considered forfeited or abandoned. Only deliver the recommended amount. This recommendation is the same as 37-235B	12.52 1.000	4.800 1.000
37-235C	6/15/1883	0.580		This recommendation reflects a portion of water right 37-235A. When recommendations 37-235C, 37-236A, and 37-308A are combined they are limited to 74 acres of irrigation.	When recommendations 37-235C and 37-235D are combined they equal water right 37-235A. Therefore, deliver per recommendation to avoid confusion.	1.000	0.580
37-235D	6/15/1883	0.420		This recommendation reflects a portion of water right 37-235A. When recommendations 37-235D, 37-236B, and 37-308B are combined they are limited to 110 acres of irrigation.	When recommendations 37-235C and 37-235D are combined they equal water right 37-235A. Therefore, deliver per recommendation to avoid confusion.	See 37-235C above	0.420
37-236A	6/15/1884	2.320		This recommendation reflects a portion of water right 37-236. When recommendations 37-235C, 37-236A, and 37-308A are combined they are limited to 74 acres of irrigation.	When recommendations 37-236A and 37-236B are combined they equal water right 37-236. Therefore, deliver per recommendation to avoid confusion.	4.000	2.320
37-236B	6/15/1884	1.680		This recommendation reflects a portion of water right 37-236. When recommendations 37-235D, 37-236B, and 37-308B are combined they are limited to 110 acres of irrigation.	When recommendations 37-236A and 37-236B are combined they equal water right 37-236. Therefore, deliver per recommendation to avoid confusion.	See 37-236A above	1.680
37-308A	5/14/1886	0.920		This recommendation reflects a portion of water right 37-308. When recommendations 37-235C, 37-236A, and 37-308A are combined they are limited to 74 acres of irrigation.	When recommendations 37-308A and 37-308B are combined they equal water right 37-308. Therefore, deliver per recommendation to avoid confusion.	1.600	0.920
37-308B	5/14/1886	0.680		This recommendation reflects a portion of water right 37-308. When recommendations 37-235D, 37-236B, and 37-308B are combined they are limited to 110 acres of irrigation.	When recommendations 37-308A and 37-308B are combined they equal water right 37-308. Therefore, deliver per recommendation to avoid confusion.	See 37-308 above	0.680
37-363D	4/21/1883	0.300		This recommendation reflects 37-363D in water right database	Same as 37-363D in water right database	0.300	0.300
37-419C	8/2/1889	0.460		This recommendation represents a portion of water right 37-419A. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	This recommendaton was filed on a portion of 37-419A. No claims were filed against the remainder of this water right, therefore, they should be considered forfeited or abandoned. Deliver this right per the recommendation.	1.800	0.460
37-419D	8/2/1889	0.926		This recommendation represents a portion of water right 37-419A. Recommendations 37-353D, 37-418D, 37-419D, 37-443, 37-480B, 37-637, 37-665H, 37-666H, 37-667K, 37-713B, 37-802, 37-2345A, 37-2684 and 37-11671 when combined should not irrigate more than 1528 acres. Recommendations 37-802 and 37-2684 are ground water rights not regulated by the watermaster.	This recommendaton was filed on a portion of 37-419A. No claims were filed against the remainder of this water right, therefore, they should be considered forfeited or abandoned. Deliver this right per the recommendation.	See 37-419C above.	0.926
37-4D	3/24/1883	0.510		This right was moved to the District 45 canal by transfer. The transfer limited the right to 0.14 cfs at the canal headgate and .06 cfs at the field headgate where water is removed from the canal. This right requires that 0.18 cfs be diverted into the Hiawatha canal to mitigate the channel losses in that canal by moving the water, and cannot be diverted by other water users. This right also requires that 0.19 cfs remain in the river to mitigate the change in delivery canals. The water right also allowed 0.08 cfs for channel losses in the District 45 canal, which explains the 0.14 cfs at the canal diversion and 0.06 cfs at the field diversion.	This right reflects a transfer performed on this water right. Therefore, it should be delivered per the recommendation.	0.140	0.140

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-501B	5/1/1886	0.400		This recommendation reflects 37-501B on the water rights side. Recommendations 37-597B, 37-590B, 37-501C, 37-501B, 37-115F, and 37-2502 are limited to 268 acres of irrigation. Recommendation 37-2502 is ground water right not regulated by the watermaster.	This is the same as 37=501B	0.400	0.400
37-501C	5/1/1886	2.000		This recommendation reflects 37-501C on the water rights side. Recommendations 37-597B, 37-590B, 37-501C, 37-501B, 37-115F, and 37-2502 are limited to 268 acres of irrigation. Recommendation 37-2502 is ground water right not regulated by the watermaster.	This is the same as 37=501C	2.000	2.000
37-501D	5/1/1886	0.800		This recommendation reflects 37-501D on the water rights side. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	This is the same as 37=501D	0.800	0.800
37-501E	5/1/1886	4.200		This recommendation reflects a portion of 37-501A. Recommendations 37-501E, 37-2631, 37-2664A, 37-2668, and 37-19735 are combined they are limited to 602 acres of irrigation. Recommendations 37-2631, 37-2664A, 37-2668, and 37-19735 are ground water rights not regulated by the watermaster.	When recommendations 37-501E and 37-501F are combined they equal 37-501E on the water right side.	4.200	4.200
37-501F	5/1/1886	0.600		This recommendation reflects a portion of 37-501A	When recommendations 37-501E and 37-501F are combined they equal 37-501E on the water right side.	0.600	0.600
37-509	6/1/1884	2.850		This recommendation through an accomplished transfer or a change to the water right that happened before 1987 claimed wildlife and aesthetic uses that were not on the original decreed right. The original decreed right was for irrigation uses only. During the review of the accomplished transfer, the diversion rate was reduced to accomodate the new uses.	Even though the owners are claiming an accomplished transfer has happened, that accomplished transfer isn't official until the water right is decreed. Therefore, this right should be delivered per the water right database records.	4.000	4.000
37-577AP	3/24/1883	1.530		This right reflects water right 37-30016 in the water right database. The water for this right includes 0.10 cfs for conveyence loss. Only 1.43 cfs can be diverted from the canal through the field headgate. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	Same as 37-30016 in water right database	1.530	1.530
37-577BT	3/24/1883	2.200		This is a portion of the Riley right, but there is no way to link this right to the water right database. Recommendations 37-481C, 37-482H, 37-483C, 37-577BT, and 37-2630 when combined are limited to the irrigation of 289 acres. Recommendation 37-2630 is a ground water right not under the control of the watermaster.	This is a portion of the Riley right. There is no way to trace it to the water right database, but it has been delivered per the watermaster delivery lists. Deliver as recommended.	unknown	2.200
37-577K	3/24/1883	1.380		This is a portion of the Riley right 37-30003, but it doesn't match the diversion rate listed in the water right database. Recommendations 37-577K and 37-2568 when combined are limited to 154 acres of irrigation. Recommendation 37-2568 is a ground water right that is not regulated by the watermaster.	This recommendation is for a portion of water right 37-30003, but it didn't claim the entire amount of this right. Due to the numerous splits on this right, it should be delivered as recommended.	2.000	1.380
37-590B	5/1/1886	1.000		This recommendation reflects water right 37-590B. Recommendations 37-597B, 37-590B, 37-501C, 37-501B, 37-115F, and 37-2502 are limited to 268 acres of irrigation. Recommendation 37-2502 is ground water right not regulated by the watermaster.	Same as water right 37-590B	1.000	1.000

37-597A	5/1/1886	1.600		This recommendation reflects water right 37-597B. Recommendations 37-115G, 37-117, 37-158D, 37-418C, 37-419C, 37-501D, 37-577AP, 37-597A, 37-664B, 37-665I, 37-666G, 37-666H, 37-667L, 37-667M, 37-886D, 37-2656, 37-7645, 37-7658B, and 37-7856 when combined are limited to 1171 acres. 37-2656, 37-7645, 37-7658B & 37-7856 are ground water rights that are not under the watermaster's control.	Same as water right 37-597A	1.600	1.600	
37-597B	5/1/1886	0.700		This recommendation reflects water right 37-597B. Recommendations 37-597B, 37-590B, 37-501C, 37-501B, 37-115F, and 37-2502 are limited to 268 acres of irrigation. Recommendation 37-2502 is ground water right not regulated by the watermaster.	Same as water right 37-597B	0.700	0.700	
37-705	5/31/1883	2.200		This right reflects water right 37-705. Due to a transfer to move the point of diversion, this right is required to leave 0.03 cfs in the river for mitigation, so only 2.17 cfs is allowed to be diverted into the canal headgate. Recommendations 37-113K, 37-482D, and 37-705 when combined are limited to the irrigation of 141 acres.	Same as water right 37-705	2.20 cfs - .03 cfs for mitigation = 2.17 cfs	2.170	
37-713B	6/10/1880	3.000		This right reflects water right 37-713B. Recommendations 37-353D, 37-418D, 37-419D, 37-443, 37-480B, 37-637, 37-665H, 37-666H, 37-667K, 37-713B, 37-802, 37-2345A, 37-2684 and 37-11671 when combined should not irrigate more than 1528 acres. Recommendations 37-802 and 37-2684 are ground water rights not regulated by the watermaster.	Same as water right 37-713B	3.000	3.000	
37-833F	11/21/1936	1.300		This recommendation reflects water right 37-833F. This right is limited to the irrigation of 41 acres. Recommendations 37-833F and 37-8196 when combined are limited to the irrigation of 152 acre. Water right 37-8196 is a ground water right not regulated by the watermaster.	Same as water right 37-833F	1.300	1.300	
37-881	5/1/1901	3.600		This recommendation reflects water right 37-881. Recommendations 37-115B, 37-667C, 37-881, and 37-4433 when combined are limited to 143 acres. 37-4433 is a ground water right that is not under the watermaster's control.	Same as water right 37-881	3.600	3.600	
37-8915	8/28/2000			THIS IS A WATER RIGHT PERMIT, NO ADJUDICATION CLAIM REQUIRED.	This permit allows the use of 0.20 cfs of water for aesthetic use for a small pond. This basically adds an aesthetic use to irrigation recommendations 37-21509, 37-21521, 37-21532, 37-21543, 37-21554, and 37-21565, but does not allow additional diversions from the river or the well. Recommendations 37-21509 is a ground water right not regulated by the watermaster. Whereas this right does not add additional flows into the canal or irrigation ditch, the watermaster's only duty is to ensure that water is not delivered under this right to the pond when recommendations 37-21509, 37-21521, 37-21532, 37-21543, 37-21554, and 37-21565 are curtailed.	0.200	0.000	
TOTAL WATER DELIVERED TO THE DISTICT 45 CANAL AT FULL FLOWS IS -->								367.349

PLEASE NOTE: Recommendation 37-113F is a ground water right associated with delivery in this canal. When water is not available for delivery under the 7/10/1884 priority date, this ground water right is to be shut down by the watermaster.
 ALSO NOTE: No SRBA claims were filed on water rights 37-422 and 37-2322, therefore, they are considered abandoned or forfeited.

GLENDALE 50 DELIVERY LIST

RECOMMENDATION NUMBER	PRIORITY DATE	DIVERSION RATE IN CFS	DIVERSION VOLUME IN AF	COMMENTS	water right comments	Diversion rate/volume currently allowed by water right record. In cfs/afa	CURRENT DELIVERY REQUIREMENT IN CFS
37-562A	5/10/1887	2.360		This right is based on decreed right 37-562A. This right required that 0.12 cfs be left in the Big Wood River for mitigation, therefore only 2.24 cfs is delivered to the Glendale Canal Headgate.	Water right is the same as recommendation.	2.36 - 0.12 for mitigation = 2.24	2.240
37-562H	5/10/1887	1.540		This right is based on a portion of decreed right 37-562C. This right required that 0.08 cfs be left in the Big Wood River for mitigation, therefore only 1.46 cfs is delivered to the Glendale Canal Headgate. Water rights 37-562H and 37-617B when combined are limited to 100 acres of irrigation. Water rights 37-562H, 37-617B, and 37-8536 when combined are limited to 108 acres of irrigation. 37-8536 is a ground water right that is not regulated by the watermaster.	Recommendations 37-562H and 37-562J when combined are the same as 37-562C. Therefore, until decreed deliver the water right record.	1.60 cfs - 0.08 cfs for mitigation = 1.52 cfs	1.52 cfs
37-562J	5/10/1887	0.060		This right is based on a portion of decreed right 37-562C. Water rights 37-562J and 37-617C when combined are limited to 4.5 acres of irrigation. 37-604F	6/3/1887	0.530		This right is a portion of water right 37-604A. When 37-604F and 37-7775F are combined they are limited to 20 acres of irrigation. Water right 37-7775F is a ground water right not subject to watermaster control.	Recommendations 37-604B, 37-604C, 37-604D, 37-604F, 37-604G, and 37-604D are portions of water right 37-604 in the water right database. They match exactly, so the watermaster should deliver these rights per the water right record until the recommendations are decreed.	See 37-604B above.	0.000	
37-604G	6/3/1887	0.530		This right is a portion of water right 37-604A. When 37-604G and 37-7775G are combined they are limited to 20 acres of irrigation. Water right 37-7775G is a ground water right not subject to watermaster control.	Recommendations 37-604B, 37-604C, 37-604D, 37-604F, 37-604G, and 37-604D are portions of water right 37-604 in the water right database. They match exactly, so the watermaster should deliver these rights per the water right record until the recommendations are decreed.	See 37-604B above.	0.000	
37-604H	6/3/1887	0.530		This right is a portion of water right 37-604A. When 37-604H and 37-7775B are combined they are limited to 20 acres of irrigation. Water right 37-7775B is a ground water right not subject to watermaster control.	Recommendations 37-604B, 37-604C, 37-604D, 37-604F, 37-604G, and 37-604D are portions of water right 37-604 in the water right database. They match exactly, so the watermaster should deliver these rights per the water right record until the recommendations are decreed.	See 37-604B above.	0.000	
37-604E	6/3/1887	1.040		This right is diverted from a well located in the SWNE S22 T1N R18E also known as Lot 1A in Rocking Chair Ranch Subdivision. Wood River water is diverted into the Glendale Canal and is left there unused to provide mitigation for this right. When this right can no longer be diverted into the Glendale Canal, the water diverted under water right 37-604E must cease diversion. When water rights 37-604E and 37-7775E are combined, they are limited to 0.72 cfs and an annual volume of 126 afa and 36 acres of irrigation. Water right 37-7775E is currently not regulated by the watermaster.	This right is the same as water right 37-604B	1.040	1.040	
37-7775E	This right was included in the water district per transfer 5306, and shouldn't have been. The well for water right 37-604E Recommendation is the same well as this right, but only the amount of ground water diverted under 37-604E is subject to watermaster control. I have included this number for reference to help explain the watermaster comment in the water right database. The watermaster comment was removed in the recommendation.							
37-833H	11/12/1936	0.540		This recommendation is based on the 37-833H in the water right database. This right is limited to the irrigation of 17 acres. Water rights 37-577Y, 37-833H, 37-7243, and 37-7995 are limited to 23.9 acres of irrigation. Water rights 37-7243 and 37-7995 are ground water right that are not subject to watermaster control.	This right is the same as water right 37-833H	0.540	0.540	
37-577Y	3/24/1883	0.500		This recommendation is based on the 37-30018 in the water right database. This right allows 0.04 cfs for stream loss mitigation, so only 0.46 cfs can be diverted at the field headgate. Water rights 37-577Y, 37-833H, 37-7243, and 37-7995 are limited to 23.9 acres of irrigation. Water rights 37-7243 and 37-7995 are ground water right that are not subject to watermaster control.	This right is the same as water right 37-30018. There was an error on 37-30018 conditions. The condition claims that 0.10 cfs be left in the river and 0.46 cfs be diverted at the headgate. The water right has a diversion rate of 0.50 cfs, so obviously those numbers don't add up. The SRBA recommendation corrected this condition, so deliver per the recommendation.	0.50 cfs - 0.04 cfs = 0.46 cfs	0.460	
37420	10/31/1889	3.200		This recommendation based on 37-420. When 37-420 and 37-610 are combined they are limited to 80 acres of irrigation	This right recommended the same as water right database record.	3.200	3.200	
37-601	9/18/1885	2.400		This recommendation based on 37-601. When 37-420 and 37-610 are combined they are limited to 80 acres of irrigation	This right recommended the same as water right database record.	2.400	2.400

37-43A	6/1/1891	0.590		<p>Recommendations 37-43A and 37-43C appear to have been split from water right 37-43A in the water right database. Water right 37-43B was split during a transfer that moved it to the Bannon canal. Recommendation 37-43A has a conveyence loss requirement of 0.21 cfs, which would leave 0.38 cfs in the river, however the water records don't have this requirement for water right 37-43A. Water right 37-43B does have a conveyence loss requirement, but that was because the water right was moved to a different diversion point. Recommendation 37-43C doesn't have any conveyence loss requirement. I can't determine at this time why recommendation 37-43A has conveyence loss and 37-43C doesn't at this time. When both of these recommendations are combined, they are less than the amount allowed under water right 37-43A, so there appears to be some confusion in these records.</p>	<p>Water right 37-43A is the only portion of water right 37-43 that is diverted out of the Glendale canal. Whereas, no transfer has taken place to change the base records, this right should be delivered per the water right records. Water right 37-43A doesn't have any conveyance loss requirements, therefore the full amount should be delivered to the headgate. The recommendation records should not be delivered until the water rights are decreed.</p>	1.620	1.620
37-43C	6/1/1891	0.590		<p>Recommendations 37-43A and 37-43C appear to have been split from water right 37-43A in the water right database. Water right 37-43B was split during a transfer that moved it to the Bannon canal. Recommendation 37-43A has a conveyence loss requirement of 0.21 cfs, which would leave 0.38 cfs in the river, however the water records don't have this requirement for water right 37-43A. Water right 37-43B does have a conveyence loss requirement, but that was because the water right was moved to a different diversion point. 37-11814	10/31/1889	1.600		This right is based on a portion of water right 37-429. Recommendations 37-11811, 37-11813, 37-11814, and 37-11815 when combined are limited to 153.9 acres. This recommendation is limited to 40 acres of irrigation	The water right and the recommendation are fairly close. However, the recommendations were not split by a transfer, so this right must be delivered by the water right record until the recommendations are decreed.	See 37-429A above.	0.000
37-11811	10/15/1884	2.880		This right is based on water right 37-316B. Recommendations 37-11811, 37-11813, 37-11814, and 37-11815 when combined are limited to 153.9 acres. This recommendation is limited to 80 acres of irrigation. This right also allows for 0.08 cfs to be left in the river for mitigation, so only 2.80 cfs can be delivered to the headgate	This recommendation is identical to water right 37-316B. Deliver per recommendation.	2.88 cfs - 0.08 cfs for mitigation = 2.80 cfs at headgate.	
37-11813	6/15/1885	2.600		This right is based on a portion of water right 37-52. Recommendations 37-11811, 37-11813, 37-11814, and 37-11815 when combined are limited to 153.9 acres.	This recommendation is identical to water right 37-52. Deliver per recommendation.	2.600	2.600
37-11815	10/31/1889	3.200		This right is based on a portion of water right 37-360. Recommendations 37-11811, 37-11813, 37-11814, and 37-11815 when combined are limited to 153.9 acres. This recommendation is limited to 80 acres of irrigation	This recommendation is identical to water right 37-360. Deliver per recommendation.	3.200	3.200
37-22220	5/2/1884	0.110		This right is a split of 37-203. Recommendations 37-22220, 37-22222, 37-22224, 37-22226, and 37-22228 are combined they are limited to the irrigation of 527 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	0.110	0.110
37-22222	7/15/1887	0.140		This right is a split of 37-204. Recommendations 37-22220, 37-22222, 37-22224, 37-22226, and 37-22228 are combined they are limited to the irrigation of 527 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	0.140	0.140
37-22224	8/9/1889	0.110		This right is a split of 37-205. Recommendations 37-22220, 37-22222, 37-22224, 37-22226, and 37-22228 are combined they are limited to the irrigation of 527 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	0.110	0.110
37-22226	6/1/1901	0.060		This right is a split of 37-206. Recommendations 37-22220, 37-22222, 37-22224, 37-22226, and 37-22228 are combined they are limited to the irrigation of 527 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	0.060	0.060
37-22228	6/10/1887	0.030		This right is a split of 37-479. Recommendations 37-22220, 37-22222, 37-22224, 37-22226, and 37-22228 are combined they are limited to the irrigation of 527 acres. This right was originally for 2.80 cfs, but an unknown transfer split the right and move 1.20 cfs of the right. That moved portion is now numbered in the recommendation layer as 37-21122. The splits match the original right. This right is limited to 170 acres of irrigation.	The splits of the recommendations match the original water right, so deliver per the recommendation.	0.030	0.030
37-22219	5/2/1884	6.290		This right is a split of 37-203. Recommendations 37-22219, 37-22221, 37-22223, 37-22225, and 37-22227 are combined they are limited to the irrigation of 9.4 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	6.290	6.290
37-22221	7/15/1887	7.860		This right is a split of 37-204. Recommendations 37-22219, 37-22221, 37-22223, 37-22225, and 37-22227 are combined they are limited to the irrigation of 9.4 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	7.860	7.860
37-22223	8/9/1899	6.290		This right is a split of 37-205. Recommendations 37-22219, 37-22221, 37-22223, 37-22225, and 37-22227 are combined they are limited to the irrigation of 9.4 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	6.290	6.290
37-22225	6/1/1901	3.140		This right is a split of 37-206. Recommendations 37-22219, 37-22221, 37-22223, 37-22225, and 37-22227 are combined they are limited to the irrigation of 9.4 acres.	The splits of the recommendations match the original water right, so deliver per the recommendation.	3.140	3.140
37-22227	6/10/1887	1.570		This right is a split of 37-479. Recommendations 37-22219, 37-22221, 37-22223, 37-22225, and 37-22227 are combined they are limited to the irrigation of 9.4 acres. This right was originally for 2.80 cfs, but an unknown transfer split the right and move 1.20 cfs of the right. That moved portion is now numbered in the recommendation layer as 37-21122. The splits match the original right. This right is limited to 3 acres of irrigation.	The splits of the recommendations match the original water right, so deliver per the recommendation.	1.570	1.570

GLENDALE 50 DELIVERY LIST
